In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/2000.

(a) Due to shorter available sample periods and the implied impact on the standardisation of the time series, past values of the ESI and EEI were revised to align the variability of the indicators to those of EU Member States. Detailed results for individual survey questions are available on the Commission BCS website: [https://ec.europa.eu/economy\\_finance/bcs](https://ec.europa.eu/economy_finance/bcs)

The economic sentiment indicator and the employment expectations indicator are composite indicators. More information about their computation is available in the user guide published on the Commission BCS website.

All confidence indicators are balances.

The country weights have been updated in January 2022.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 2000.

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e. differences between the percentages of respondents giving positive and negative replies.

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/2000.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

TABLE 3a: **Quarterly survey of services (s.a.)**

(Data collected in January, April, July and October each year.)

**Capacity utilisation in services (%)**

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, := not available.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/2000.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

TABLE 6: Monthly survey of construction industry (s.a.) <sup>(a)</sup>

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.
