

LOW CARBON HYDROGEN: GAS PACKAGE AMENDMENT

NON-PAPER FROM FRANCE, ROMANIA, POLAND, HUNGARY, SLOVAKIA, BULGARIA, CROATIA, SLOVENIA

In line with our ministerial letter “Maintaining a steadfast course on our climate ambition and technological neutrality is the key to the success of the EU Hydrogen Strategy” shared today, we support the following amendment in the Gas package and **we urge the Presidency to include it in its next compromise.**

New article

Possibility to use low-carbon hydrogen and low-carbon fuels in decarbonisation objectives

For the calculation of the reduction referred to in article 25 point (a) and article 22a point (b) of the recast renewable directive [xxxx/xxxx], Member States may take into account low carbon-hydrogen and low-carbon fuels.
