NOTE

From: General Secretariat of the Council
To: Permanent Representatives Committee/Council
Subject: European Council meeting (15 December 2022)
– Draft conclusions

In accordance with Article 3(1) of the Rules of Procedure of the European Council, delegations will find attached the draft conclusions prepared by the President of the European Council, in close cooperation with the member of the European Council representing the Member State holding the six-monthly Presidency of the Council and with the President of the Commission.

I. UKRAINE/RUSSIA

1. The European Council reiterates its resolute condemnation of Russia's war of aggression against Ukraine.
2. It reaffirms the Union's full support for Ukraine's independence, sovereignty and territorial integrity within its internationally recognised borders.
3. The European Union remains committed to providing political and military support to Ukraine [notably through an increased European Peace Facility]. [Member States confirm their readiness to step up the provision of air defence capacities and demining assistance to Ukraine.]
4. Russia's ongoing campaign of systematic missile strikes against Ukrainian civilians, civilian targets, energy infrastructure and utilities, to inflict even more suffering on the Ukrainian people, is a crime for which there can be no impunity. It must stop. The European Council also calls on Russia to immediately put an end to endangering the safe functioning of civilian nuclear facilities.
5. The European Union will urgently intensify the provision of humanitarian and civil protection assistance to Ukraine, including in kind, and assist in the restoration of Ukraine's critical infrastructure to help Ukraine get through the winter. In this regard, the European Council invites the European Investment Bank, in close cooperation with the Commission and International Financial Institutions, to step up its support for Ukraine's most urgent infrastructure needs. The European Council also invites the Commission to intensify coordination with European industry and international partners to provide a sustainable supply of priority equipment to Ukraine such as power generators, mobile thermal stations, power transformers, high voltage and lighting equipment.

6. The European Union will also maintain its support for displaced persons, both within and outside Ukraine. The European Council invites the Commission and the Member States to intensify contingency planning.
7. The European Union remains committed to supporting, along with partners, Ukraine's financial relief, resilience and long-term reconstruction. *[p.m.: MFA+]*
8. The European Council welcomes efforts to ensure full accountability for war crimes and the other most serious crimes in connection with Russia's war of aggression against Ukraine, including ways to secure accountability for the crime of aggression. It underlines the Union's support for the investigations by the Prosecutor of the International Criminal Court. The European Council also took stock of the options to use frozen assets to support Ukraine's reconstruction and for the purposes of reparation. It invites the Commission, the High Representative and the Council to bring work forward.
9. [The European Council discussed how to further increase collective pressure on Russia to end its war of aggression and to withdraw its troops from Ukraine. It [welcomes][calls for] the reinforcement of EU restrictive measures against Russia, including through the international oil price cap, while underlining the importance of ensuring effective implementation, preventing circumvention and facilitation thereof. [It reiterates its call on all countries to align with EU sanctions.]]
10. The European Union stands ready to provide all relevant support to the Republic of Moldova as it deals with the multifaceted impact of Russia's war of aggression against Ukraine, notably as regards energy security.
11. In the context of bolstering global food security, the European Council also underlines the importance of the Solidarity Lanes, the UN Black Sea Grain Initiative and the Grain from Ukraine programme, stressing the need to continue to ensure the availability and affordability of fertilisers.

II. ENERGY AND ECONOMY

12. The European Council reviewed progress in the implementation of its October 2022 conclusions.
13. *[p.m.: Results of the extraordinary Energy Council on 13 December]*
14. In view of the 2023 filling and heating seasons, the European Council underlines the importance of strengthening coordination. In particular, work should continue on the following strands:
 - a) speedy operationalisation of the gas demand aggregation and joint purchasing mechanism through the EU energy platform;
 - b) efficient filling of gas storages and close monitoring of the filling trajectories;
 - c) early preparation of contingency plans for the winter 2023/2024;
 - d) swift finalisation of the negotiations on the Renewable Energy Directive and the Energy Efficiency Directive.
15. The European Council reiterates the importance of stepping up investment in innovation, infrastructure and energy efficiency projects, in order to phase out the Union's dependency on Russian energy imports, accelerate the green transition and ensure security of supply.
16. The European Council looks forward to the proposal and impact assessment on the reform of the EU's electricity market, making it fully fit for a decarbonised energy system, to be submitted by the Commission in early 2023.

17. In light of the impact of high energy prices, the European Council underlines the importance of safeguarding Europe's economic, industrial and technological base and of preserving the global level playing field. The European Council recalls in that context the need for a coordinated policy response mobilising all relevant tools at national and EU level to enhance the resilience of our economies, while preserving Europe's global competitiveness and the integrity of the Single Market.
18. The European Council stresses the importance of close coordination and of common European level solutions, where appropriate, and invites the Council and the Eurogroup to closely monitor economic developments and further reinforce coordination, in order to deliver a determined and agile policy response.

III. SECURITY AND DEFENCE

19. In line with previous decisions, the European Union is taking more responsibility for its own security and, in the field of defence, pursuing a strategic course of action and increasing its capacity to act autonomously. Strengthening the industrial and technological base of the European defence sector will contribute to this.
20. The European Council underlines the importance of the transatlantic bond as reflected in both the EU Strategic Compass and the NATO Strategic Concept.
21. The European Council took stock of work carried out to implement its previous conclusions, the guidance provided in Versailles on 10 and 11 March 2022 and the Strategic Compass. In this context, the European Council:
 - a) calls on the European Parliament and the Council to swiftly adopt the European Defence Industry Reinforcement through common Procurement Act (EDIRPA);

- b) calls on the Commission and the European Defence Agency to intensify ongoing efforts to identify needs and to facilitate and coordinate joint procurement, in particular to replenish stocks, notably in the light of the support provided to Ukraine;
 - c) calls on the Commission to rapidly present a proposal for a European Defence Investment Programme to reinforce the capacity and resilience of the European defence technology and industrial sector, including SMEs;
 - d) calls for the implementation of the military mobility infrastructure projects, including dual-use infrastructure projects, to be further accelerated;
 - e) reiterates the commitment to invest in the capabilities necessary to conduct the full range of missions and operations and calls on the Member States to make full use of the collaborative instruments and frameworks to this effect;
 - f) calls for investment in strategic enablers, such as cybersecurity and space-based connectivity, as well as in the resilience of critical infrastructures;
 - g) calls for a strong EU Policy on Cyber Defence, building on the recent joint communication of the Commission and the High Representative.
22. The European Council reaffirms the importance of the Union's commitment to support its partners in the field of security and defence, especially through instruments such as the European Peace Facility and CSDP missions and operations [*p.m.: financial sustainability of EPF*].

IV. SOUTHERN NEIGHBOURHOOD

23. The European Council held a strategic discussion on relations with the Southern Neighbourhood.

V. EXTERNAL RELATIONS

24. The European Council held a strategic discussion on transatlantic relations.
