THE EUROPEAN PARLIAMENT AND THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 114 thereof,

Having regard to the proposal from the European Commission,

After transmission of the draft legislative act to the national parliaments,

Having regard to the opinion of the European Economic and Social Committee¹,

Acting in accordance with the ordinary legislative procedure,

Whereas:

- (1) In the Capital Markets Union (CMU) Action Plan², the Commission proposed to improve public access to entities' financial and non-financial information by building a European Single Access Point (ESAP). The Commission Digital Finance Strategy³ sets out general lines on how Europe can support the digital transformation of finance in the coming years, and in particular to promote a data-driven finance. In the Strategy for Financing the Transition to a Sustainable Economy⁴, the Commission placed sustainable finance at the heart of the financial system as a key means to achieve the green transition of the EU economy, as part of the Green Deal⁵. **AM 1 Silva Pereira**
- (2) ESAP is to be established in accordance with Regulation (EU) XXX/XXX of the European Parliament and of the Council [ESAP Regulation]⁶ in order to enable an easy access to data for decision makers in the economy and society to make sound decisions

that serve the efficient functioning of the market. Rolling out common European data spaces in crucial sectors, including the financial sector, would serve that purpose. The financial world is expected to undergo a digital transformation in the coming years, and the Union should support this, in particular by promoting data-driven finance. **Ensuring easier access to public information is also crucial to increasing opportunities for small and medium business growth, visibility, and innovation. This includes easier access to voluntary information.** Furthermore, putting sustainable finance at the heart of the financial system is a key means to achieving a green transition of the Union economy. For the green transition to succeed through sustainable finance, it is essential that information related to the sustainability **and social governance** of businesses is easily accessible to investors so that they are better informed when making decisions about investments. For those purposes, public access to financial and non-financial **and ESG-related** information on natural or natural **legal** persons (**‘entities’**) required to make information public, or **publicly disclosing such** submitting financial and sustainability-related information about their economic activities to a collection body on a voluntary basis (**‘entities’**) needs to be improved. An efficient means to do so at Union level is to establish a centralised platform, ESAP, giving electronic access to all relevant information. **AM 2 Silva Pereira, AM 48 Fitzgerald**

- (3) ESAP should provide the public with an easy centralised access to information about entities and their products in relation to financial services, capital markets and sustainability that entities and authorities are required to publish in accordance with a number of Directives **and Regulations** in that field, **according to a file-once principle and without entailing any additional reporting requirements beyond those specified by law.** **Nevertheless,** any natural or legal person may submit information about its economic activities of relevance to financial services, or to capital markets or concerning sustainability to a collection body with a view to making that information accessible on ESAP in accordance with Article 3 of Regulation (EU) XXX/XXX [ESAP Regulation]. **AM 3 Silva Pereira, AM 49 Fitzgerald**
- (4) A number of Regulations in the field of financial services, capital markets and sustainability should be amended in order to enable the functioning of ESAP. To allow for a sound and efficient functioning of ESAP in a proportionate manner, the scaling-up of the collection and submission of the information would need to be gradual.
- (5) For the functioning of ESAP, collection bodies should be designated to collect from the relevant entities the information in relation to financial services, capital markets and sustainability. In the absence of a collection body already established under Union law, Member States shall designate **at least** one of the Officially Appointed Mechanisms established under Directive 2004/109/EC of the European Parliament and of the Council⁷ to collect and store the information, and notify the European Securities and Markets Authority (ESMA) accordingly. That Officially Appointed Mechanism should act as a collection body as defined in Article 2, point (2) of Regulation (EU) XXXX/XXX [ESAP Regulation] and should carry out the specific tasks set out in that Regulation. Where a European Supervisory Authority or a competent authority is required under Union law to draw-up and publish on its website information on the relevant entities and their financial products in relation to financial services, capital markets and sustainability, that authority should act as a collection body as defined in

⁷ Directive 2004/109/EC of the European Parliament and of the Council of 15 December 2004 on the harmonisation of transparency requirements in relation to information about issuers whose securities are admitted to trading on a regulated market and amending Directive 2001/34/EC (OJ L 390, 31.12.2004, p. 38).

Article 2, point (2) of Regulation (EU) XXXX/XXX [ESAP Regulation]. That authority should publish information in a data extractable format, include the names and, where available, the legal entity identifier of the entity, and specify the type of information.

- (6) To ensure that ESAP provides timely access to information that is relevant for financial services, capital markets and sustainability as set out in Regulation (EU) XXXX/XXX [ESAP Regulation], entities should submit their information to a collection body at the same time as they make that information public. **In turn, collection bodies should make the information available to ESAP in automated ways and without undue delay, drawing to the extent possible upon the existing collection procedures and infrastructures in place, at Union and national level, for the transmission of information from collection bodies to ESMA. AM 4 Silva Pereira, AM 51 Fitzgerald**
- (7) In order for the information to be digitally usable, entities should submit to the collection bodies the information **in at least** a data extractable format or, where required under Union law, in a machine-readable format. Entities should also accompany the information they submit to the collection bodies with the metadata requested by those collection bodies. The Commission should be empowered to adopt implementing technical standards developed by the relevant European Supervisory Authority specifying the metadata for each piece of information, the data structuring of the information and information for which a machine-readable format is required and which machine-readable format is to be used in that case. **In respect of standards concerning sustainability information, the Joint Committee of the European Supervisory Authorities should consult the European Financial Reporting Advisory Group (EFRAG) on the development of these draft implementing standards. All standards should seek to make ESAP future-proof and consider potential interoperability at a global level in the future, thus should draw upon global standards and best practices where relevant. AM 5 Silva Pereira, AM 52 Billy Kelleher, Stéphanie Yon-Courtin, Pascal Durand, Gilles Boyer, Caroline Nagtegaal**
- (8) Entities should be held responsible for the information **and accompanying metadata** they submit to the collection bodies. Ensuring data integrity and credibility of the source would ~~enable to~~ protect entities from undue alteration of their information, and build public trust in ESAP. To that purpose, documents submitted by entities to the collection bodies should be accompanied by a qualified electronic seal included by the reporting entity on the information submitted to the collection bodies where such seal is required, in accordance with specifications set out in Regulation (EU) XXXX/XXX [ESAP Regulation]. **AM 6 Silva Pereira, AM 53 Billy Kelleher, Caroline Nagtegaal**
- (8 a) **Collection bodies should not be responsible for verifying the accuracy of the content of the information, unless mandated to do so in accordance with the relevant Union law listed in the Annex to this Regulation. Entities subject to mandatory reporting should be responsible for ensuring the accuracy of the information submitted owing to their legal obligations under the relevant Union law listed in the Annex to this Regulation or national law. AM 54 Billy Kelleher, Caroline Nagtegaal**

- (9) The European Data Protection Supervisor was consulted in accordance with Article 42(1) of Regulation (EU) 2018/1725⁸ and delivered an opinion on **19 January 2022**⁹.
AM 7 Silva Pereira
- (10) Since the objective of this Regulation, namely to harmonise the disclosure requirements for the public information that should be accessible through ESAP, cannot be sufficiently achieved by the Member States and can therefore, by reason its scale or effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve that objective.
- (11) The following Regulations should therefore be amended accordingly:
- Regulation (EC) No 1060/2009 on credit rating agencies¹⁰;
 - Regulation (EU) No 236/2012 on short selling and certain aspects of credit default swaps¹¹;
