‘Article 7a

Active Account

1. Financial counterparties or non-financial counterparties that are subject to the clearing obligation in accordance with Articles 4a and 10 and clear any of the categories

of the derivative contracts referred to in paragraph 2 shall clear at least *proportions* of such contracts at *active* accounts at CCPs authorised under Article 14.

~~*The obligation referred to in the first subparagraph shall remain for as long as the derivative contracts referred to in paragraph 2 are being cleared. (AM 30 Hübner; AM 260 Lalucq, et al.)*~~

1a. For the purposes of paragraph 1 of this Article, an account at a CCP authorised under Article 14 shall be deemed active where it complies with the following conditions:

(a) it satisfies initial margin and daily margin requirements against existing positions;

(b) new positions are entered into on a regular basis on the same account. (AM 31 Hübner)

1b. ESMA shall develop draft regulatory technical standards to specify how often new positions are to be entered into the same account in order for that account to be considered 'active' for the purposes of paragraph 1a.

ESMA shall submit those draft regulatory technical standards to the Commission by ... [612 months after the date of entry into force of this amending Regulation].

Power is delegated to the Commission to adopt the regulatory technical standards referred to in the first subparagraph of this paragraph in accordance with Articles 10 to 14 of Regulation (EU) No 1095/2010. (AM 32 Hübner)

1c. The obligation laid down in paragraph 1 shall apply to derivative contracts entered into on or after... [the date of entry into force of this Regulation]. (AM 33 Hübner)

~~*1d. In determining its obligations in relation to paragraph 1, a financial counterparty or a non-financial counterparty belonging to a group subject to consolidated supervision in the Union shall consider all derivative contracts referred to in paragraph 2 that are cleared by that counterparty or by other entities within the group to which that counterparty belongs. Financial counterparties or non-financial counterparties belonging to the same group shall be subject to the obligation set out in paragraph 1 if any entity in the group clears any of the categories of derivative contracts referred to in paragraph 2. (AM 34 Hübner; AM 259 Lalucq, et al.)*~~

2. The obligation laid down in paragraph 1 of this Article shall apply to any of the following:

(a) OTC interest rate derivatives denominated in euro and Polish zloty;

(b) short-term interest rate derivatives (STIR) denominated in euro;

(c) other categories of derivative contracts pertaining to clearing services identified by ESMA as being of substantial systemic importance in accordance with Article 25(2c).

Where ESMA undertakes an assessment pursuant to Article 25(2c), as referred to in point (c) of the first subparagraph, and concludes that certain services or activities

provided by Tier 2 CCPs that were previously identified by ESMA as being of substantial systemic importance for the Union or one or more of its Member States no longer are, the Commission is empowered to adopt a delegated act to amend paragraph 2 accordingly, in accordance with Article 82. (AM 35 Hübner; AM 261 Lalucq, et al.; AM 262 Gruffat)

~~3. — A financial counterparty or a non-financial counterparty that is subject to the obligation laid down in paragraph 1 of this Article, shall calculate its activities in the categories of derivative contracts referred to in paragraph 2 at CCPs authorised under Article 14 and, separately, at CCPs recognised under Article 25 to ensure their compliance with the obligations set out in those paragraphs, and shall report to ESMA the outcome of the calculation on an annual basis. ESMA shall immediately transmit that information to the Joint Monitoring Mechanism referred to in Article 23c. (AM 265 and 271 Lalucq, et al.; AM 266-268 and 270 Gruffat)~~

~~The financial counterparty or non-financial counterparty shall include in that calculation all derivative contracts referred to in paragraph 2 of this Article entered into by that counterparty or by other entities within the group to which that counterparty belongs. (AM 36 Hübner)~~

4. ESMA shall calculate and monitor the level of activity in the derivative contracts referred to in paragraph 2 of this Article **on an aggregate average basis**, and shall transmit that information to the Joint Monitoring Mechanism referred to in Article 23c. (AM 37 Hübner; AM 270 Gruffat; AM 271 Lalucq, et al.)

4a. By ... **[1836 months from the date of entry into force of this amending Regulation]** ESMA shall, in cooperation with the Joint Monitoring Mechanism established under Article 23c, submit a report to the Commission assessing the following:

(a) *the number of accounts opened at CCPs authorised under Article 14 as a result of the obligation set out in paragraph 1;*

(b) *the amount of activity financial counterparties and non-financial counterparties maintain in the active accounts referred to in paragraph 1, relative to their overall clearing activity in the contracts referred to in paragraph 2;*

(c) *the frequency with which new trades are cleared through active accounts by the different types of counterparties;*

(d) *an assessment of the effectiveness of the active accounts in mitigating the risks for the Union or for one or more of its Member States posed by substantially systemic Tier 2 CCPs or their clearing services.*

Option 1

(e) where the requirement referred to in paragraph 1 has not led, or is not likely to lead, to sufficient mitigation of the financial stability risks for the Union or for one or more of its Member States, the proportion of activity in each category of the derivative contracts referred to in paragraph 2 that

financial and non-financial counterparties shall clear through their active accounts. When identifying the proportion of activity, ESMA shall consider:

- (i) the different sub-categories of each category of the derivative contracts referred to in paragraph 2;*
- (ii) the different types of financial counterparties and non-financial counterparties and their respective characteristics;*
- (iii) the potential costs or risks of requiring a proportion of activity on different types of financial counterparties or non-financial counterparties, including the outcome of the cost benefit analysis as required under Article 10 of Regulation (EU) 1095/2010;*
- (iv) the potential impact that the level of activity may have on the competitiveness of financial counterparties and non-financial counterparties;*
- (v) the potential risk that costs related to the allocation of a proportion of activity are passed on to clients;*
- (vi) market developments which may require a new assessment pursuant to Article 25(2c);*
- (vii) the impact on financial stability.*

On the basis of that report, the Commission shall submit a legislative proposal to the European Parliament and the Council.

Option 2

Where ESMA concludes that the requirement referred to in paragraph 1 has not led, or is not likely to lead, to sufficient mitigation of the financial stability risks for the Union or for one or more of its Member States, it shall, in cooperation with EBA, EIOPA and the ESRB and after consulting the ESCB, develop draft regulatory technical standards specifying the following:

- (a) the proportion of activity in each category of the derivative contracts referred to in paragraph 2 that financial and non-financial counterparties shall clear through their active accounts;*
- (b) the methodology for calculation under paragraph 3, ensuring that the calculation:
 - (i) includes the categories of derivative contracts referred to in paragraph 2 entered into by that financial counterparty or non financial counterparty or entered into by other entities within the group to which that financial counterparty or non financial counterparty belongs;*
 - (ii) does not lead to the double counting of the positions of clearing members and clients; (AM 277 Lalucq, et al.)**
- (c) provides for different phase-in periods for the progressive implementation of the requirement to hold a proportion of activity in the derivative contracts referred to in paragraph 2.*

For the purpose of point (a) of the second subparagraph, where appropriate, different proportions may be set for different sub-types of derivative contracts, for different types of counterparty, and for different types of activity.

Those set proportions shall not include outstanding contracts and shall be set at a level that results in a reduction in clearing in those derivative contracts at those Tier 2 CCPs offering services of substantial systemic importance for the financial stability of the Union or one or more of its Member States pursuant to Article 25(2c) and contributes to reducing the substantial systemic importance of clearing in such derivative contracts.

When developing the technical standards referred to in the second subparagraph, ESMA shall take into account all of the following:

(a) the different sub-categories of each category of the derivative contracts referred to in paragraph 2;

(b) the different types of financial counterparties and non-financial counterparties and their respective characteristics;

(c) the potential costs or risks of requiring a proportion of activity on different types of financial counterparties or non-financial counterparties, including the outcome of the cost benefit analysis as required under Article 10 of Regulation (EU) 1095/2010;

(d) the potential impact that the level of activity may have on the competitiveness of financial counterparties and non-financial counterparties;

(e) the potential risk that costs related to the allocation of a proportion of activity are passed on to clients;

(f) market developments which may require a new assessment pursuant to Article 25(2c);

(h) the impact on financial stability.

ESMA shall submit those draft regulatory technical standards to the Commission by 12 months after the submission of the report referred to in paragraph 4 of this Article.

Power is delegated to the Commission to adopt the regulatory technical standards referred to in the second subparagraph of this paragraph in accordance with Articles 10 to 14 of Regulation (EU) No 1095/2010. (AM 38 and 39 Hübner)

~~*5. ESMA shall, in cooperation with the EBA, EIOPA and ESRB and after consulting the ESCB, develop draft implementing technical standards specifying the format of the information to be submitted to the competent authorities referred to in paragraphs 3 and 4.*~~

~~ESMA shall submit those draft implementing technical standards to the Commission by [PO: please insert the date = 12 months after the date of entry into force of this Regulation].~~

It shall take into account the liquidity risk following the default of a market participant and the concentration risk on certain assets that may result in establishing the acceptable collateral and the relevant haircuts. When revising the level of the haircuts it applies to the assets it accepts as collateral, the CCP shall take into account any potential procyclicality effects of such revisions.’;

EBA, in accordance with Article 16 of Regulation (EU) No 1093/2010, in coordination with ESMA, in accordance with Article 16 of Regulation (EU) No 1095/2010, shall develop guidelines to ensure a consistent methodology for integrating the concentration risk arising from exposures towards central counterparties in the supervisory stress testing.’;

(5) Article 104, (1) is amended as follows:

(a) the introductory wording is replaced by the following:

‘For the purposes of Article 97, Article 98(1), point (b), Article 98(4), (5) and (9), Article 101(4) and Article 102 of this Directive and of the application of Regulation (EU) No 575/2013, competent authorities shall have at least the power to:’;

(b) the following point [(n)] is added:

‘[(n)] require institutions to reduce exposures towards a central counterparty or to realign exposures across their clearing accounts in accordance with Article 7a of Regulation (EU) No 648/2012, where the competent authority considers there is excessive concentration risk towards that central counterparty.’;

Article 3

Amendments to Directive (EU) 2019/2034

Directive (EU) 2019/2034 is amended as follows:

(1) in Article 26(1), point (b) is replaced by the following:

“(b) effective processes to identify, manage, monitor and report the risks that investment firms are or might be exposed to, or the risks that they pose or might pose to others, including concentration risk arising from exposures towards central counterparties, taking into account the conditions set out in Article 7a of Regulation (EU) No 648/2012.”

(2) Article 29 (1) is amended as follows:

(a) the following point (e) is added:

‘(e) material sources and effects of concentration risk arising from exposures towards central counterparties and any material impact on own funds.’;

(b) the following subparagraph is added:

‘For the purpose of the first subparagraph, point (e), Member States shall ensure that the management body develops specific plans and quantifiable targets in accordance with the proportions set out in accordance with Article 7a of Regulation (EU) No 648/2012 to monitor and address the concentration risk arising from exposures towards central counterparties offering services of substantial systemic importance for the Union or one or more of its Member States.’;

(3) in Article 36(1), the following subparagraph is added:

‘For the purpose of the first subparagraph, point (a), competent authorities shall assess and monitor developments of investment firms’ practices concerning the management of their concentration risk arising from exposures towards central counterparties, including the plans developed in accordance with Article 29(1), point (e), of this Directive as well as the progress made in adapting the investment firms’ business models to the relevant policy objectives of the Union, taking into account the requirements set out in Article 7a of Regulation (EU) No 648/2012.’;

(4) Article 39(2) is amended as follows:

(a) the introductory wording is replaced by the following:

‘For the purposes of Article 29, point (e), Article 36, Article 37(3) and Article 39 of this Directive and of the application of Regulation (EU) No 575/2013, competent authorities shall have at least the power to:’;

(b) the following point (n) is added:

‘(n) require institutions to reduce exposures towards a central counterparty or to realign exposures across their clearing accounts in accordance with Article 7a of Regulation (EU) No 648/2012, where the competent authority considers there is excessive concentration risk towards that central counterparty.’;

- (1) Regulation (EU) No 648/2012 of the European Parliament and of the Council¹ contributes to the reduction of systemic risk by increasing the transparency of over-the-counter (OTC) derivatives market and by reducing the counterparty credit and operational risks associated with OTC derivatives.
- (2) Post-trade infrastructures are a fundamental aspect of the Capital Markets Union and are responsible for a range of post-trade processes, including clearing. An efficient and competitive clearing system in the Union is essential for the functioning of Union capital markets and is a cornerstone of the Union's financial stability. It is therefore necessary to lay down further rules to improve the efficiency of clearing services in the Union in general, and of central counterparties (CCPs) in particular, by streamlining procedures, especially for the provision of additional services or activities and for changing CCPs' risk models, by increasing liquidity, by encouraging clearing at Union CCPs, by modernising the framework under which CCPs operate, and by providing the necessary flexibility to CCPs and other financial actors to compete within the single market.
- (3) To attract business, CCPs must be safe and resilient. Regulation (EU) No 648/2012 lays down measures to increase the transparency of derivatives markets and mitigate risks through clearing and the exchange of margin. In that respect, CCPs play an important role in mitigating financial risks. Rules should therefore be laid down to further enhance the stability of Union CCPs, notably by amending certain aspects of the regulatory framework. In addition, and in recognition of Union CCPs' role in preserving the Union's financial stability, it is necessary to strengthen further their supervision, with particular attention to their role within the broader financial system and the fact they provide services across borders.
- (4) Central clearing is a global business and Union market participants are active internationally. However, since the Commission adopted the proposal for a Regulation of the European Parliament and of the Council amending Regulation (EU) No 1095/2010 establishing a European Supervisory Authority (European Securities and Markets Authority) and amending Regulation (EU) No 648/2012 as regards the procedures and authorities involved for the authorisation of CCPs and requirements for the recognition of third-country CCPs in 2017², concerns have been expressed repeatedly, including by the European Securities and Markets Authority (ESMA)³, about the ongoing risks to the Union financial stability arising from the excessive concentration of clearing in some third-country CCPs, in particular due to the potential risks that can arise in a stress scenario. In the short-term, to mitigate the risk of cliff edge effects related to the withdrawal of the UK from the Union due to an abrupt disruption of Union market participants' access to UK CCPs, the Commission adopted

¹ Regulation (EU) No 648/2012 of the European Parliament and of the Council of 4 July 2012 on OTC derivatives, central counterparties and trade repositories (OJ L 201, 27.7.2012, p. 1).

a series of equivalence decisions to maintain access to UK CCPs. However, the Commission called on Union market participants to reduce their excessive exposures to systemic CCPs outside the Union in the medium term. The Commission reiterated that call in its communication “The European economic and financial system: fostering openness, strength and resilience”⁴ in January 2021. The risks and effects of excessive exposures to systemic CCPs outside the Union were considered in the report published by ESMA in December 2021⁵ following an assessment conducted in accordance with Article 25(2c) of Regulation (EU) No 648/2012. That report concluded that some services provided by those systemically important UK CCPs were of such substantial systemic importance that the current arrangements under Regulation (EU) No 648/2012 were insufficient to manage the risks to the Union financial stability. To mitigate the potential financial stability risks to the Union due to the continued excessive reliance on systemic third-country CCPs, but also to enhance the proportionality of measures for those third-country CCPs that present less risks for the financial stability of the Union, it is necessary to further tailor the framework introduced by Regulation (EU) 2019/2099 to the risks presented by different third-country CCPs.

- (5) Article 4(2) and Article 11(5) to (10) of Regulation (EU) No 648/2012 exempt intragroup transactions from the clearing obligation and the margin requirements. To provide more legal certainty and predictability concerning the framework for intragroup transactions, the equivalence decisions in Article 13 of that Regulation should be replaced by a simpler framework. Article 3 of that Regulation should therefore be amended to replace the need for an equivalence decision with a list of third countries for which an exemption should not be granted. Consequently, Article 13 of that Regulation should be deleted. Since Article 382 of Regulation (EU) No 575/2013 of the European Parliament and of the Council⁶ refers to intragroup transactions as provided for in Article 3 of Regulation (EU) No 648/2012, that Article 382 should also be amended accordingly.
- (6) Given the fact that entities that are established in countries that are listed as high-risk third countries that have strategic deficiencies in their regime on anti-money laundering and counter terrorist financing, as referred to in Article 9 of Directive (EU) 2015/849 of the European Parliament and of the Council⁷, or in third countries that are listed in Annex I to the Council conclusions on the revised EU list of non-cooperative

⁷ Directive (EU) 2015/849 of the European Parliament and of the Council of 20 May 2015 on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, amending Regulation (EU) No 648/2012 of the European Parliament and of the Council, and repealing Directive 2005/60/EC of the European Parliament and of the Council and Commission Directive 2006/70/EC (OJ L 141, 5.6.2015, p. 73).

jurisdictions for tax purposes⁸ are subject to a less stringent regulatory environment, their operations may increase the risk, including due to increased counterparty credit risk and legal risk, for the Union financial stability. Consequently, such entities should not be eligible to be considered in the framework of intragroup transactions.

- (7) Strategic deficiencies in the regime on anti-money laundering and counter terrorist financing, or lack of cooperation for tax purposes are not necessarily the only factors that can influence risk, including counterparty credit risk and legal risk, associated with derivative contracts. Other factors, such as the supervisory framework, also play a role. The Commission should therefore be empowered to adopt delegated acts to identify the third countries whose entities may not benefit from those exemptions despite not being identified in those lists. Considering that intragroup transactions benefit from reduced regulatory requirements, regulators and supervisors should carefully monitor and assess the risks associated with transactions involving entities from third countries.
- (8) To ensure a level playing field between Union and third-country credit institutions offering clearing services to pension scheme arrangements, an exemption from the clearing obligation under Article 4, point (iv), of Regulation (EU) No 648/2012 should be introduced where a Union financial counterparty or a non-financial counterparty that is subject to the clearing obligation enters into a transaction with a pension scheme arrangement established in a third country which is exempted from the clearing obligation under that third country's national law.
- (9) Regulation (EU) No 648/2012 promotes the use of central clearing as the main risk-mitigation technique for OTC derivatives. The risks associated with an OTC derivative contract are therefore best mitigated when that derivative contract is cleared by a CCP authorised under Article 14 or recognised under Article 25 of that Regulation. It follows that in the calculation of the position that is compared to the thresholds specified pursuant to Article 10(4), point (b), of Regulation (EU) No 648/2012, only those derivative contracts that are not cleared by a CCP authorised under Article 14 or recognised under Article 25 of that Regulation should be included in that calculation.
- (10) It is necessary to address the financial stability risks associated with excessive exposures of Union clearing members and clients to systemically important third-country CCPs (Tier 2 CCPs) that provide clearing services that have been identified by ESMA as clearing services of substantial systemic importance pursuant to Article 25(2c) of Regulation (EU) No 648/2012. In December 2021, ESMA concluded that the provision of certain clearing services provided by two Tier 2 CCPs, namely for interest rate derivatives denominated in euro and Polish zloty, Credit Default Swaps (CDS) denominated in euro and Short-Term Interest Rate Derivatives (STIR) denominated in euro, are of substantial systemic importance for the Union or one or more of its Member States. As noted by ESMA in its December 2021 assessment report, were those Tier 2 CCPs to face financial distress, changes to those CCPs' eligible collateral, margins or haircuts may negatively impact the sovereign bond markets of one or more Member

⁸ Council conclusions on the revised EU list of non-cooperative jurisdictions for tax purposes and the Annexes thereto (OJ C 413 I, 12.10.2021, p. 1).

States, and more broadly the Union financial stability. Furthermore, disruptions in markets relevant for monetary policy implementation may hamper the transmission mechanism critical to central banks of issue. It is therefore appropriate to require any financial counterparties and non-financial counterparties that are subject to the clearing obligation to hold, directly or indirectly, accounts with a minimum level of activity at CCPs established in the Union. That requirement should reduce the provision of those clearing services by those Tier 2 CCPs to a level where such clearing is no longer of substantial systemic importance.

(11) It is necessary to ensure that the calibration of the level of the clearing activity to be maintained in accounts at Union CCPs can be adapted to changing circumstances. ESMA has an important role in the assessment of the substantial systemic importance of third-country CCPs and their clearing services. ESMA, in cooperation with the European Banking Authority (EBA), the European Insurance and Occupational Pensions Authority (EIOPA) and the ESRB, and after having consulted the European System of Central Banks (ESCB), should therefore develop draft regulatory technical standards specifying the details of the level of substantially systemic clearing services to be maintained in the active accounts in Union CCPs by financial and non-financial counterparties subject to the clearing obligation. Such calibration should not go beyond what is necessary and proportionate to reduce clearing in the identified clearing services at Tier 2 CCPs concerned. In that regard, ESMA should consider the costs, risks and the burden such calibration entails for financial and non-financial counterparties, the impact on their competitiveness, and the risk that those costs are passed on to non-financial firms. Furthermore, ESMA should also ensure that the envisaged reduction in clearing in those instruments, identified as of substantial systemic importance, results in them no longer being considered of substantial systemic importance when ESMA reviews the recognition of the relevant CCPs which according to Article 25(5) of that Regulation and where such a review should be done at least every five years. In addition, suitable phase-in periods for the progressive implementation of the requirement to hold a certain level of the clearing activity in the accounts at Union CCPs should be foreseen.

(12) To ensure that clients are aware of their options and can take an informed decision as where to clear their derivative contracts, clearing members and clients that provide clearing services in both Union and recognised third-country CCPs should inform their clients about the option to clear a derivative contract in a Union CCP so that clearing in those services identified as of substantial systemic importance is reduced in Tier 2 CCPs in order to ensure the financial stability of the Union.

(13) To ensure that competent authorities have the necessary information on the clearing activities undertaken by clearing members or clients in recognised CCPs, a reporting obligation should be introduced for such clearing members or clients. The information to be reported should distinguish between securities transactions, derivative transactions traded on a regulated market and over-the-counter (OTC) derivatives transactions.

- (14) Regulation (EU) 2019/834 of the European Parliament and of the Council⁹ amended Regulation (EU) No 648/2012 to introduce, *inter alia*, an exemption from reporting requirements for OTC derivative transactions between counterparties within a group, where at least one of the counterparties is a non-financial counterparty. That exemption has been introduced because intragroup transactions involving non-financial counterparties represent a relatively small fraction of all OTC derivative transactions and are used primarily for internal hedging within groups. As such, those transactions do not significantly contribute to systemic risk and interconnectedness with the rest of the financial system. The exemption for those transactions from reporting requirements has, however, limited the ability of ESMA, the ESRB and other authorities to clearly identify and assess the risks taken by non-financial counterparties. To ensure more visibility on intragroup transactions, considering their potential interconnectedness with the rest of the financial system and taking into account recent market developments, in particular strains on energy markets as a result of Russia's unprovoked and unjustified aggression against Ukraine, that exemption should be removed.
- (15) To ensure that competent authorities are at all times aware of exposures at entity and group level and are able to monitor such exposures, competent authorities should establish effective cooperation procedures to calculate the positions in contracts not cleared at an authorised or recognised CCP and to actively evaluate and assess the level of exposure in OTC derivative contracts at entity and group level.
- (16) It is necessary to ensure that Commission Delegated Regulation (EU) No 149/2013 of 19 December 2012 supplementing Regulation (EU) No 648/2012 of the European Parliament and of the Council¹⁰ relating to the criteria for establishing which OTC derivative contracts are objectively measurable as reducing risks continues to be appropriate in light of market developments. It is also necessary to ensure that the clearing thresholds laid down in that Commission Delegated Regulation relating to values of those thresholds properly and accurately reflect the different risks and characteristics in derivatives, other than interest rate, foreign exchange, credit and equity derivatives. ESMA should therefore also review and clarify, where appropriate, that Commission Delegated Regulation and propose amending it if necessary. ESMA is encouraged to consider and provide, *inter alia*, more granularity for commodity derivatives. That granularity could be achieved by separating the clearing thresholds by sector and type, such as differentiating between agriculture, energy or metal related commodities or differentiating those commodities based on other features such as environmental, social and governance criteria, environmentally sustainable investments

⁹ Regulation (EU) 2019/834 of the European Parliament and of the Council of 20 May 2019 amending Regulation (EU) No 648/2012 as regards the clearing obligation, the suspension of the clearing obligation, the reporting requirements, the risk-mitigation techniques for OTC derivative contracts not cleared by a central counterparty, the registration and supervision of trade repositories and the requirements for trade repositories (OJ L 141, 28.5.2019, p. 42).

¹⁰ Commission Delegated Regulation (EU) No 149/2013 of 19 December 2012 supplementing Regulation (EU) No 648/2012 of the European Parliament and of the Council with regard to regulatory technical standards on indirect clearing arrangements, the clearing obligation, the public register, access to a trading venue, non-financial counterparties, and risk mitigation techniques for OTC derivatives contracts not cleared by a CCP (OJ L 52, 23.2.2013, p.11).

or crypto-related features. During the review, ESMA should endeavour to consult relevant stakeholders that have specific knowledge on particular commodities.

(17) Non-financial counterparties that have to exchange collateral for OTC derivative contracts not cleared by a CCP should have sufficient time to negotiate and test the arrangements to exchange such collateral.

(18) To ensure a uniform application of the risk-management procedures requiring the timely, accurate and appropriately segregated exchange of collateral with respect to OTC derivative contracts entered into by financial counterparties and non-financial counterparties, the European Supervisory Authorities (ESAs) should take the necessary actions to ensure such uniform application.

(19) To ensure a consistent and convergent approach amongst competent authorities throughout the Union, authorised CCPs or legal persons that wish to be authorised under Article 14 of Regulation (EU) No 648/2012 to provide clearing services and activities in financial instruments should also be able to be authorised to provide clearing services and other activities in relation to non-financial instruments. Regulation (EU) No 648/2012 applies to CCPs as entities, and not to specific services, as set out in Article 1(2) of that Regulation. When a CCP clears non-financial instruments, in addition to financial instruments, the CCP's competent authority should be able to ensure that the CCP complies with all requirements of Regulation (EU) No 648/2012 for all services it offers.

(20) Union CCPs face challenges in expanding their product offer and experience difficulties in bringing new products to the market. Those challenges and difficulties can be explained by certain provisions of Regulation (EU) No 648/2012 that render some authorisation procedures too long, complex and uncertain in their outcome. The process of authorising Union CCPs or extending their authorisation should therefore be simplified, while ensuring the appropriate involvement of ESMA and the college referred to in Article 18 of Regulation (EU) No 648/2012. First, to avoid significant, and potentially indefinite, delays when competent authorities assess the completeness of an application for an authorisation, the competent authority should swiftly acknowledge receipt of that application and quickly verify whether the CCP has provided the documents required for the assessment. To ensure that Union CCPs submit all required documents with their applications, ESMA should develop draft regulatory and implementing technical standards specifying which documents should be provided, what information those documents should contain and in which format they should be submitted. Second, to ensure an efficient and concurrent assessment of applications, CCPs should be able to submit all documents via a central database where they should be shared instantaneously with the CCP's competent authority, ESMA and the college. Third, a CCP's competent authority, ESMA and the college should, during the assessment period, engage and ask the CCP any questions to ensure a swift, flexible, and cooperative process for a comprehensive review. To avoid duplication and unnecessary delays, all questions and subsequent clarifications should also be shared simultaneously between the CCP's competent authority, ESMA and the college.

- (21) There is currently uncertainty as to when an additional service or activity is covered by a CCP's existing authorisation. It is necessary to address that uncertainty and to ensure proportionality when the proposed additional service or activity does not increase the risks for the CCP. It is therefore necessary to lay down that applications in those cases should not undergo the full assessment procedure. For that reason, it should be specified which additional clearing services and activities are non-material, and thus do not increase the risks for a Union CCP, and should be approved through a non-objection procedure by that CCP's competent authority. That non-objection procedure should be applied where the CCP intends to clear one or more financial instruments belonging to the same classes of financial instruments for which it has been authorised to clear, provided such financial instruments are traded on a trading venue for which the CCP already provides clearing services or performs activities and the proposed additional clearing service or activity does not involve a payment in a new currency. That non-objection procedure should also be applied where the CCP adds a new Union currency in a class of financial instruments already covered by the CCP's authorisation, or where the CCP adds one or more additional tenors to a class of financial instruments already covered by the CCP's authorisation provided that the maturity range is not significantly extended. In addition, a CCP should also be able to ask its competent authority for the non-objection procedure to apply where that CCP considers that the proposed additional service or activity would not increase its risks, in particular where the new clearing service or activity is similar to the services the CCP is already authorised to provide. The non-objection procedure should not require a separate opinion from ESMA and the college since such requirement would be disproportionate. Instead, ESMA and the college should be able to provide input to the CCP's competent authority through the joint supervisory team established for that CCP.
- (22) To foster a cooperative supervision of CCPs on an ongoing basis, the college should issue an opinion where a competent authority considers withdrawing a CCP's authorisation and when a competent authority conducts the annual review and evaluation of that CCP.
- (23) To ensure the consistent functioning of all colleges and to further enhance supervisory convergence, ESMA should manage and chair the college for each Union CCP and should be granted the right to vote in that college.
- (24) ESMA should be able to contribute more effectively to ensuring that Union CCPs are safe, robust and competitive in providing their services throughout the Union. Therefore, ESMA should, in addition to the supervisory competences currently laid down in Regulation (EU) No 648/2012, also issue an opinion to the CCP's competent authority about a CCP's annual review and evaluation, the withdrawal of its authorisation and margin requirements. When issuing an opinion, ESMA should assess a CCP's compliance with the applicable requirements, focusing in particular on identified cross-border risks or risks to the financial stability of the Union. It is also necessary to further enhance supervisory convergence and to ensure that all stakeholders are informed of ESMA's and the college's assessment of a CCP's activities. ESMA should therefore disclose, taking into account the need to protect

confidential information, the fact that a competent authority does not comply or does not intend to comply with its opinion or the opinion of the college and any conditions or recommendations included therein. ESMA should be able to decide, on a case by case basis, to publish the reasons provided by the competent authority for not complying with the ESMA opinion or the college opinion or any conditions or recommendations contained therein.

- (25) It is necessary to ensure that the CCP complies with Regulation (EU) No 648/2012 on an ongoing basis, including after a non-objection procedure approving the provision of additional clearing services or activities, or after a non-objection procedure for the validation of a model change in which cases ESMA and the college do not issue a separate opinion. The review conducted by the competent authority of the CCP at least on an annual basis should therefore in particular consider such new clearing services or activities and any model changes. To ensure supervisory convergence and that Union CCPs are safe, robust and competitive in providing their services throughout the Union, the report of the competent authority should be subject to an opinion by ESMA and the college and should be submitted every year.
- (26) ESMA should have the means to identify potential risks to the Union's financial stability. ESMA should therefore, in cooperation with the EBA, EIOPA, and the ECB in the framework of the tasks concerning the prudential supervision of credit institutions within the single supervisory mechanism conferred upon it in accordance with Council Regulation (EU) No 1024/2013¹¹, identify the interconnections and interdependencies between different CCPs and legal persons, including shared clearing members, clients and indirect clients, shared material service providers, shared material liquidity providers, cross-collateral arrangements, cross-default provisions and cross-CCP netting, cross-guarantee agreements and risks transfers and back-to-back trading arrangements.
- (27) The central banks of issue of the Union currencies of the financial instruments cleared by authorised CCPs that have requested membership of the CCP Supervisory Committee are non-voting members of that committee. They only participate to its meetings for Union CCPs in the context of discussions about the Union-wide assessments of the resilience of those CCPs to adverse market developments and relevant market developments. Contrary to their involvement in the supervision of third-country CCPs, central banks of issue are thus insufficiently involved on supervisory matters for Union CCPs that are of direct relevance to the conduct of monetary policy and the smooth operation of payments systems, which leads to insufficient consideration of cross-border risks. It is therefore appropriate that those central banks of issue are able to attend as non-voting members all meetings of the CCP Supervisory Committee when it convenes for Union CCPs.
- (28) It is necessary to ensure a prompt exchange of information, knowledge sharing and effective cooperation between the authorities involved in the supervision of authorised CCPs, and in particular where a swift decision by a CCP's competent authority is

¹¹ [...]

required. It is therefore appropriate to set up a joint supervisory team for each Union CCP to assist those supervisory authorities, including by providing input to the CCP's competent authority within the context of the non-objection procedure for extending a CCP's existing authorisation, assisting in establishing the frequency and depth of a CCP's review and evaluation, and participating to on-site inspections. Considering that a CCP's competent authority remains ultimately responsible for the final supervisory decisions, the joint supervisory teams should work under the auspices of the CCP's competent authority for which the team is established and should be composed of staff members from the CCP's competent authority, ESMA and certain members of the college. Other members of the college should also be able to request to participate justifying the request based on their assessment of the impact that the CCP's financial distress could have on the financial stability of their respective Member State.

(29) To enhance the ability of relevant Union bodies to have a comprehensive overview of market developments relevant for clearing in the Union, monitor the implementation of certain clearing related requirements of Regulation (EU) No 648/2012 and collectively discuss the potential risks arising from the interconnectedness of different financial actors and other issues related to the financial stability it is necessary to establish a cross-sectoral monitoring mechanism bringing together the relevant Union bodies involved in the supervision of Union CCPs, clearing members and clients. Such Joint Monitoring Mechanism should be managed and chaired by ESMA as the Union authority involved in the supervision of Union CCPs and supervising systemically important third-country CCPs. Other participants should include representatives from the Commission, the EBA, EIOPA, the ESRB, the ECB and the ECB in the framework of the tasks concerning the prudential supervision of credit institutions within the single supervisory mechanism conferred upon it in accordance with Council Regulation (EU) No 1024/2013.

(30) To inform future policy decisions, ESMA, in cooperation with the other bodies participating in the Joint Monitoring Mechanism, should submit an annual report to the European Parliament, the Council and the Commission on the results of their activities. ESMA might institute a breach of Union law procedure pursuant to Article 17 of Regulation (EU) No 1095/2010 of the European Parliament and of the Council¹², where, on the basis of the information received as part of the Joint Monitoring Mechanism and following the discussions held therein, ESMA considers that competent authorities fail to ensure clearing members' and clients' compliance with the requirement to clear at least a proportion of identified contracts at accounts at Union CCPs, or where ESMA identifies a risk to the financial stability of the Union due to an alleged breach or non-application of Union law. Before instituting such breach of Union law procedure, ESMA might issue guidelines and recommendations pursuant to Article 16 of that Regulation. Where, on the basis of the information received as part of the Joint Monitoring Mechanism and following the discussions held therein, ESMA considers

¹² Regulation (EU) No 1095/2010 of the European Parliament and of the Council of 24 November 2010 establishing a European Supervisory Authority (European Securities and Markets Authority), amending Decision No 716/2009/EC and repealing Commission Decision 2009/77/EC (OJ L 331, 15.12.2010, p. 84).

that compliance with the requirement to clear at least a proportion of identified contracts at accounts at Union CCPs does not effectively ensure the reduction of Union clearing members' and clients' excessive exposure to Tier 2 CCPs, it should review and propose amending the relevant Commission Delegated Regulation specifying further that requirement, proposing to set, where necessary, an appropriate adaptation period.

- (31) The 2020 market turmoil as a result of the Covid-19 pandemic and the 2022 high prices on energy wholesale markets following Russia's unprovoked and unjustified aggression against Ukraine showed that, while it is essential for competent authorities to cooperate and exchange information to address ensuing risks when events with cross-border impacts emerge, ESMA still lacks the necessary tools to ensure such coordination and a convergent approach at Union level. ESMA should therefore be able to convene meetings of the CCP Supervisory Committee, either on its own initiative or upon request, potentially with an enlarged composition, to coordinate effectively competent authorities' responses in emergency situations. ESMA should also be able to ask, by simple request, information from market participants which is necessary for ESMA to perform its coordination function in those situations and to be able to issue recommendations to the competent authority.
- (32) To reduce the burden on CCPs and ESMA, it should be clarified that where ESMA undertakes a review of a third-country CCP's recognition pursuant to Article 25(5), first subparagraph, point (b), that third-country CCP should not be obliged to submit a new application for recognition. It should, however, provide ESMA with all information necessary for such review. Consequently, ESMA's review of a third-country CCP's recognition should not constitute a new recognition of that CCP.
- (33) The Commission should be able, when adopting an equivalence decision, to waive the requirement for that third country to have an effective equivalent system for the recognition of third-country CCPs. In considering where such an approach would be proportionate, the Commission might consider a range of different factors, including compliance with the Principles for Financial Market Infrastructures published by the Committee on Payments and Market Infrastructures and the International Organisation of Securities Commissions, the size of the third-country CCPs established in that jurisdiction and, where known, the expected activity in these third-country CCPs by clearing members and trading venues established in the Union.
- (34) To ensure that cooperation arrangements between ESMA and the relevant competent authorities of third countries are proportionate, such arrangements should reflect the specific features of the scope of services provided, or intended to be provided, within the Union by CCPs authorised in that third-country and whether those services entail specific risks to the Union or to one or more of its Member States. The cooperation arrangements should therefore reflect the degree of risk that the CCPs established in a third country potentially present to the financial stability of the Union or of one or more of its Member States.
- (35) ESMA should therefore tailor its cooperation arrangements to different third-country jurisdictions based on the CCPs established in the respective jurisdiction. In particular,

Tier 1 CCPs cover a wide range of CCP profiles hence ESMA should ensure that a cooperation arrangement is proportionate to the CCPs established in each third-country jurisdiction. ESMA should consider, amongst others, the liquidity of the markets concerned, the degree to which the CCPs' clearing activities are denominated in euro or other Union currencies and the extent to which Union entities use the services of such CCPs. Considering that the vast majority of Tier 1 CCPs provide clearing services to a limited extent to clearing members and trading venues established in the Union, ESMA's scope of assessment and information to be requested should also be limited in all those jurisdictions. To limit information requests for Tier 1 CCPs, a pre-defined range of information should in principle be requested by ESMA annually. Where the risks from a Tier 1 CCP or jurisdiction are potentially greater, more, and at least quarterly, requests and a wider scope of information requested would be justified. However, any cooperation arrangements in place when this Regulation enters into force should not be required to be adjusted unless the relevant third-country authorities so request.

- (36) Where recognition is provided under Article 25(2b) of Regulation (EU) No 648/2012, considering that those CCPs are of systemic importance for the Union or one or more of its Member States, the cooperation arrangements between ESMA and the relevant third-country authorities should cover the exchange of information for a broader range of information and with increased frequency. In that case, the cooperation arrangements should also entail procedures to ensure such a Tier 2 CCP is supervised pursuant to Article 25 of that Regulation. ESMA should ensure it can obtain all information necessary to fulfil its duties under that Regulation, including information necessary to ensure compliance with Article 25(2b) of that Regulation and to ensure that information is shared where a CCP has been granted, partially or fully, comparable compliance. To enable ESMA to carry out full and effective supervision of Tier 2 CCPs, it should be clarified that those CCPs should provide ESMA with information periodically.
- (37) To ensure that ESMA is also informed about how a Tier 2 CCP is prepared for, can mitigate and recover from financial distress, the cooperation arrangements should include the right for ESMA to be informed where a Tier 2 CCP establishes a recovery plan or where a third-country authority establishes resolution plans. ESMA should also be informed on the aspects relevant for the financial stability of the Union, or of one or more of its Member States, and on how individual clearing members, and to the extent known clients and indirect clients, could be materially affected by the implementation of such a recovery or resolution plan. The cooperation arrangements should also indicate that ESMA should be informed when a Tier 2 CCP intends to activate its recovery plan or where the third-country authorities have determined that there are indications of an emerging crisis situation that could affect the operations of the CCP, its clearing members, clients and indirect clients.
- (38) To mitigate potential risks for the financial stability of the Union, or of one or more of its Member States, CCPs and clearing houses should not be allowed to be clearing members of other CCPs nor should CCPs be able to accept to have other CCPs as clearing members or indirect clearing members.

- (39) The recent events on commodity markets as a result of Russia's unprovoked and unjustified aggression against Ukraine illustrate the fact that non-financial counterparties do not have the same access to liquidity as financial counterparties. Therefore, non-financial counterparties should not be allowed to offer client clearing services and should be only allowed to keep accounts at the CCP for assets and positions held for their own account. Where a CCP has or intends to accept non-financial counterparties as clearing members that CCP should ensure that the non-financial counterparties can fulfil the margin requirements and default funds contributions, including in stressed conditions. Considering non-financial counterparties are not subject to the same prudential requirements and liquidity safeguards as financial counterparties, their direct access to CCPs should be monitored by the competent authorities of CCPs accepting them as clearing members. . The competent authority for the CCP should report to ESMA and the college on a regular basis on the appropriateness of accepting non-financial counterparties as clearing members. ESMA might issue an opinion on the appropriateness of such arrangements following an ad-hoc peer review.
- (40) To ensure clients and indirect clients have better visibility and predictability of margin calls, and thus further develop their liquidity management strategies, clearing members and clients providing clearing services should ensure transparency towards their clients. Due to their closer relationship with CCPs and their professional experience with central clearing and liquidity management, clearing members are best placed to communicate in a clear and transparent manner to clients how CCP models work, including in stress events, and the implications such events can have on the margins clients are requested to post, including any additional margin clearing members themselves may ask. A better understanding of CCP margin models can improve clients' ability to reasonably predict margin calls and prepare themselves for collateral requests, particularly in stress events.
- (41) To ensure that margin models reflect current market conditions, CCPs should continuously and not only regularly revise the level of their margins taking into account any potentially procyclical effects of such revisions. When calling and collecting margins on an intraday basis, CCPs should further consider the potential impact of their intraday margin collections and payments on the liquidity position of their participants.
- (42) To ensure the liquidity risk is accurately defined, the entities whose default a CCP should take into account to determine such risk should be expanded to cover not only the default of clearing members but also of liquidity service providers, settlement service providers or any other service providers.
- (43) To facilitate access to clearing to those entities that do not hold sufficient amounts of highly liquid assets and in particular energy companies, under conditions to be specified by ESMA and to ensure a CCP takes those conditions into account when calculating its overall exposure to a bank that is also a clearing member, commercial bank and public bank guarantees should be considered eligible collateral. In addition, given their low credit risk profile, it should be explicitly specified that public guarantees are also eligible as collateral. Finally, a CCP should, when revising the level of the haircuts it

applies to the assets it accepts as collateral, take into account any potential procyclical effects of such revisions.

- (44) To facilitate CCPs' ability to respond promptly to market developments that may require amendments to their risk models, the process of the validation of changes to such models should be simplified. Where a change is non-significant, a non-objection validation procedure should apply. To ensure supervisory convergence, Regulation (EU) No 648/2012 should specify the changes that should be considered as significant. This should be the case where certain conditions would be met referring to different aspects of the CCP's financial position and overall risk level.
- (45) Regulation (EU) No 648/2012 should be reviewed no later than 5 years after the date of entry into force of this Regulation. This should allow time to apply the changes introduced by this Regulation. Whilst a review of Regulation (EU) No 648/2012 in its entirety should be carried out, that review should focus on the effectiveness and efficiency of that Regulation in meeting its aims, improving the efficiency and safety of Union clearing markets and preserving financial stability of the Union. The review should also consider the attractiveness of Union CCPs, the impact of this Regulation on encouraging clearing in the Union, and the extent to which the enhanced assessment and management of cross-border risks have benefited the Union.
- (46) To ensure consistency of Regulation (EU) 2017/1131 of the European Parliament and of the Council¹³ with Regulation (EU) No 648/2012 and to preserve the integrity and stability of the internal market, it is necessary to lay down in Regulation (EU) 2017/1131 a uniform set of rules to address counterparty risk in financial derivative transactions performed by money market funds (MMF), when the transactions have been cleared by a CCP that is authorised or recognised under Regulation (EU) No 648/2012. As central clearing arrangements mitigate counterparty risk that is inherent in financial derivative contracts, it is necessary to take into consideration whether a derivative has been centrally cleared by a CCP that is authorised or recognised under that Regulation, when determining the applicable counterparty risk limits. It is also necessary for regulatory and harmonisation purposes, to lift counterparty risk limits only where the counterparties use CCPs which are authorised or recognised in accordance with that Regulation, to provide clearing services to clearing members and their clients.
- (47) To ensure consistent harmonisation of rules and supervisory practice on applications for authorisation, extension of authorisation and model validations the active account requirement and the CCP participation requirements, the Commission should be empowered to adopt regulatory technical standards developed by ESMA with regard to the following: the documents CCPs are required to submit when applying for authorisation, extension of authorisation and validation of model changes; the proportion of activity in the relevant derivative contracts that should be held in active accounts at Union CCPs and the calculation methodology to be used to calculate that

¹³ Regulation (EU) 2017/1131 of the European Parliament and of the Council of 14 June 2017 on money market funds (OJ L 169, 30.6.2017, p. 8).

proportion; the scope and details of the reporting by Union clearing members and clients to their competent authorities on their clearing activity in third-country CCPs and whilst providing the mechanisms triggering a review of the values of the clearing thresholds following significant price fluctuations in the underlying class of OTC derivatives to also review the scope of the hedging exemption and thresholds for the clearing obligation to apply; and the elements to be considered when laying down the admission criteria to a CCP. The Commission should adopt those regulatory technical standards by means of delegated acts pursuant to Article 290 of the Treaty on the Functioning of the European Union (TFEU) and in accordance with Articles 10 to 14 of Regulation (EU) No 1095/2010.

(48) To ensure uniform conditions for the implementation of this Regulation, the Commission should also be empowered to adopt implementing technical standards developed by ESMA with regard to the format of the required documents for applications and the format of the reporting by Union clearing members and clients to their competent authorities on their clearing activity in third-country CCPs. The Commission should adopt those implementing technical standards by means of implementing acts pursuant to Article 291 TFEU and in accordance with Article 15 of Regulation (EU) No 1095/2010.

(49) To ensure the list of third countries whose entities may not benefit from those exemptions despite not being identified in those lists is relevant for the objectives of Regulation (EU) No 648/2012, to ensure the consistent harmonisation of the obligation to clear certain transactions in an account with an authorised CCP where ESMA undertakes an assessment pursuant to Article 25(2c) and to ensure the list of non-material changes for the non-objection procedure to apply remains relevant, the power to adopt acts in accordance with Article 290 of the TFEU should be delegated to the Commission to adjust the transactions in scope of the obligation and to change the list of non-material changes. It is of particular importance that the Commission carry out appropriate consultations during its preparatory work, including at expert level, and that those consultations be conducted in accordance with the principles laid down in the Interinstitutional Agreement of 13 April 2016 on Better Law-Making¹⁴. In particular, to ensure equal participation in the preparation of delegated acts, the European Parliament and the Council receive all documents at the same time as Member States' experts, and their experts systematically have access to meetings of Commission expert groups dealing with the preparation of delegated acts

(50) Since the objectives of this Regulation, namely to increase the safety and efficiency of Union CCPs by improving their attractiveness, encouraging clearing in the Union and enhancing the cross-border consideration of risks cannot be sufficiently achieved by the Member States but can rather, by reason of their scale and effects, be better achieved at Union level, the Union may adopt measures, in accordance with the principle of subsidiarity as set out in Article 5 of the Treaty on European Union. In accordance with

¹⁴ OJ L 123, 12.5.2016, p. 1.

the principle of proportionality, as set out in that Article, this Regulation does not go beyond what is necessary in order to achieve those objectives.

(51) Regulations (EU) No 648/2012, (EU) No 575/2013 and (EU) 2017/1131 should therefore be amended accordingly.
