Proposal for a

COUNCIL REGULATION

opening and providing for the management of the Union autonomous tariff quotas for certain fishery products for the 2024-2025 period

(Text with EEA relevance)

THE COUNCIL OF THE EUROPEAN UNION,

Having regard to the Treaty on the Functioning of the European Union, and in particular Article 31 thereof,

Having regard to the proposal from the European Commission,

Whereas,

- (1) Union supplies of certain fishery products currently depend on imports from third countries. In recent decades, the Union has become more dependent on imports to meet its demand for fishery products. In order to ensure that the Union's production of fishery products is not jeopardised and that there is an adequate supply of fishery products to its processing industry, import duties should be suspended or reduced for a number of fishery products within tariff quotas of an appropriate volume. To ensure fair competition between imported fishery products and Union fishery products on the Union market, the impact of the measures on the competitiveness of Union fish producers should also be taken into consideration.
- (2) Council Regulation (EU) 2020/1706¹ opens and provides for the management of autonomous Union tariff quotas for certain fishery products for the 2021-2023 period. Given that the period of application of that Regulation expires on 31 December 2023, a new regulation providing for tariff quotas should be adopted for the 2024-2025 period,
- (3) Since July 2014, the Union has progressively imposed restrictive measures against the Russian Federation. In its conclusions of 24 February 2022, the European Council

¹ Council Regulation (EU) 2020/1706 of 13 November 2020 opening and providing for the management of autonomous Union tariff quotas for certain fishery products for the 2021-2023 period (OJ L 385, 17.11.2020, p. 3).

stated that Russia's unprovoked and unjustified military aggression against Ukraine is grossly violating international law and the principles of the Charter of the United Nations and is undermining European and global security and stability.

- (4) Most recently, on 23 June 2023, the Council adopted an eleventh package of sanctions² against the Russian Federation over its continuous war of aggression against Ukraine.
- (5) While Russia is a member of the World Trade Organization (WTO), the Union **can rely on** ~~is relieved, by virtue of~~ the exceptions that apply under the Agreement Establishing the World Trade Organization, and in particular Article XXI of the GATT 1994, **in particular with regard to** ~~from~~ the obligation to accord to products imported from the Russian Federation the advantages granted to like products imported from other countries (most-favoured-nation treatment).
- (6) In light of the deterioration of relations between the Union and Russia, in order to ensure coherence with the Union's actions and principles in the field of the Union's external action, it would therefore not be appropriate to allow **products originating imports** ~~from~~ the Russian Federation to enjoy duty-free treatment **and most-favoured-nation treatment** with regard to the products that fall within the scope of this Regulation.
- (7) Relations between the Union and Belarus have deteriorated over the past years, because of the Belarusian regime's disregard for international law, fundamental rights and human rights. In addition, Belarus has provided extensive support to the Russian war of aggression against Ukraine from its very beginning.
- (8) Since October 2020, the Union has progressively imposed restrictive measures against Belarus over continued human rights abuses, the instrumentalisation of migrants and the involvement of Belarus in the Russian war of aggression against Ukraine. **As Belarus is not a member of WTO, the Union is not obliged, by virtue of the WTO Agreement, to accord the most-favoured-nation treatment to products from Belarus.**
- (9) In light of the deterioration of the relations between the Union and Belarus, in order to ensure coherence with the Union's actions and principles in the field of the Union's external action, it would therefore not be appropriate to allow products originating from Belarus to enjoy duty-free treatment **and most-favoured-nation treatment** with regard to the products that fall within the scope of this Regulation.

(9a) Exclusion of products from Belarus and Russia, notably Alaska Pollock, from the scope of this Regulation will have impact on trade flows and will require adaptation by the EU industry. If, as a consequence, raw materials which are currently not covered by the scope of this Regulation are identified as equivalent to those products and urgently needed during the adaptation period, this Regulation may be revised to take these circumstances into account.

- (10) All Union importers should benefit from equal and uninterrupted access to the tariff quotas provided for in this Regulation, and the rates set out for the tariff quotas should be applied without interruption to all imports of the fishery products concerned into all Member States until the tariff quotas have been used up.
- (11) Commission Implementing Regulation (EU) 2015/2447³ provides for a system of tariff-quota management, which follows the chronological order of the dates on which the custom declarations for release for free circulation were accepted. Since the tariff quotas are intended to ensure the adequate supply of fishery products to the Union's processing industry, a minimum level of treatment or operation should be required for quota entitlement.
- (12) To ensure that the tariff quotas are managed in an efficient way, Member States should be allowed to draw from the tariff quota amount the necessary quantities corresponding to their actual imports. Since that method of management requires close cooperation between the Member States and the Commission, the Commission should be able to monitor the rate at which the tariff quotas are used up and should inform the Member States accordingly.
- ~~(13) To ensure a continuous application of the suspension and reduction of autonomous Union tariff quotas for certain fishery products after the expiry of the Council Regulation (EU) 2020/1706, the regulation should enter into force the third day following that of its publication in the Official Journal of the European Union.~~

HAS ADOPTED THIS REGULATION:

Article 1

Import duties on the products listed in the Annex shall be suspended or reduced to fall within the tariff quotas at the rates, for the periods and up to the amounts indicated therein.

Article 2

The tariff quotas referred to in Article 1 of this Regulation shall be managed in accordance with Articles 49 to 54 of Implementing Regulation (EU) 2015/2447.
