# INI report on the role of ocean diplomacy for the competitiveness of EU fisheries and aquaculture (2025/2054(INI))

## CITATIONS & RECITALS

### COMP 1

*Covers (AMs falling if CA 1 is adopted): 1 (S&D), 2 (S&D), 3 (Left), 4 (Left), 5 (Left), 6 (Left), 7 (S&D), 8 (Renew), 9 (S&D), 10 (Renew), 11 (Renew), 12 (Renew), 13 (Renew), 14 (S&D), 15 (Left), 16 (Left), 17 (EPP), 18 (EPP), 19 (EPP), 20 (Left), 21 (Greens), 22 (S&D), 23 (Renew), 24 (S&D), 25 (EPP), 26 (EPP), 27 (EPP), 28 (EPP), 29 (Greens), 30 (EPP), 31 (Renew), 32 (S&D), 33 (EPP), 34 (EPP), 35 (Left), 36 (ESN), 37 (Renew), 38 (Greens), 39 (S&D), 40 (Renew), 41 (S&D), 42 (EPP), 43 (Left), 44 (ESN), 45 (ESN), 46 (ESN), 47 (ESN), 48 (ECR), 49 (Renew), 50 (EPP), 51 (EPP), 52 (Renew), 53 (Renew), 54 (S&D), 55 (S&D) and 56 (S&D).*

*Supported by:* *S&D, ECR, Renew, Greens, Left, ESN*

- having regard to the Treaty on the Functioning of the European Union, and in particular *Articles 2, 3(5), 43, 349 and 355* thereof,
- having regard to the EU’s common fisheries policy and its external dimension,
- having regard to the *Agreement for the Implementation of the Provisions of the United Nations Convention on the Law of the Sea of 10 December 1982 relating to the Conservation and Management of Straddling Fish Stocks and Highly Migratory Fish Stocks (UN Fish Stocks Agreement)*,
- *having regard to the Agreement under the United Nations Convention on the Law of the Sea on the Conservation and Sustainable Use of Marine Biological Diversity of Areas beyond National Jurisdiction of 19 June 2023*,
- having regard to the Commission communication of 5 June 2025 entitled ‘The European Ocean Pact’ (COM(2025)0281) and to the joint communication from the Commission and the High Representative of the Union for Foreign Affairs and Security Policy of 24 June 2022 entitled ‘Setting the course for a sustainable blue planet – Joint Communication on the EU’s International Ocean Governance agenda’ (JOIN(2022)0028)
- having regard to its previous resolutions on ocean governance, fisheries and the blue

economy,

- having regard to Rule 55 of its Rules of Procedure,
- having regard to the report of the Committee on Fisheries (A10-0000/2025),
- *having regard to the Commission communication of 16 October 2025 entitled “The Pact for the Mediterranean - One Sea, One Pact, One Future”, in particular its chapter “II.6 Promoting a sustainable Blue Economy”,*
- *having regard to the The Kunming-Montreal Global Biodiversity Framework (GBF),*
- *having regard to the agreement to prevent unregulated high seas fisheries in the Central Arctic Ocean,*
- *having regard to the Ministerial decision of the WTO of 17 June 2022 on Fisheries Subsidies,*
- *having regards to the Review of the state of world marine fishery resources – 2025 and The State of World Fisheries and Aquaculture 2024 from FAO,*
- *having regard to its resolution of 17 October 2023 on the implications of Chinese fishing operations on EU fisheries and the way forward,*
- *having regard to Regulation (EU) 2025/2077 of the European Parliament and of the Council of 8 October 2025 amending Regulation (EU) No 1026/2012 on certain measures for the purpose of the conservation of fish stocks in relation to countries allowing non-sustainable fishing,*

A. whereas oceans and seas cover 71 % of the Earth’s surface and over 65 % of the EU territory; whereas the EU, ***thanks to its outermost regions that give it a presence in every ocean***, oversees the world’s largest collective maritime area, comprising 25 million km<sup>2</sup> of exclusive economic zones, a coastline of over 70 000 km, and with 40 % of its citizens living within 50 km of the sea;

B. whereas the EU fishing fleet, which embodies the EU’s presence on the seas, comprising approximately 69 000 vessels, ***of which 75 % are used by coastal and small-scale fishers***, is one of the most sustainable and strictly regulated fishing fleets in the world; whereas it faces shrinking quotas, high operating costs, administrative and regulatory burdens, ***the ageing of the fishing fleet and fishers, the lack of incentives to attract new generations into the sector***, and unfair competition from non-EU countries with lower standards; ***whereas fair competition and sustainable fisheries management is key components for a prosperous and profitable sector as shown by the 2024 Annual Economic Report on the EU fishing fleet;***

***B a. whereas the lack of equal conditions has led to a significant loss of EU vessels in recent***

*years, which have either been exported temporarily or sold to third countries; whereas, when a European vessel leaves a fishing ground under an RFMO, it is replaced by a vessel from a third country, usually operating under lower environmental and social standards; whereas, at the same time, imports from such countries into the EU market are increasing;*

- B b.** *whereas the European Union's fisheries and aquaculture sector contributes about €5.5 billion per year to the EU economy and provides direct employment to around 193 000 fishers and aquaculture producers across Europe; whereas the European Union has a fish processing and canning industry with a significant socio-economic dimension that must also be preserved and strengthened;*
- C. *whereas the EU imports 70 % of its seafood, creating strategic dependency, undermining self-sufficiency and risk exposing the sector to unfair practices; whereas this state of affairs requires traceability and transparency provisions, stronger border controls and harmonisation of customs mechanisms and automatic safeguard and reciprocity clauses, in addition to the establishment of a European import control office to ensure that all imports comply with standards equivalent to those applicable in the EU;*
- D. *whereas the EU is contracting party to 18 regional fisheries management organisations (RFMOs) and 4 Regional Seas Conventions and plays a leading role in multilateral negotiations on fisheries management and marine conservation; recognising that RFMOs are the building blocks of International Ocean Governance for the management and conservation of fish stocks and are essential instruments for fostering international ocean diplomacy, strengthening cooperation among coastal and fishing nations, and ensuring the sustainable governance of the high seas;*
- D a.** *whereas the EU has 20 Sustainable Fisheries Partnership Agreements (SFPAs) for which 7 are dormant, creating a network of agreements with partner countries, which also constitute a platform for further cooperation in relation to global fisheries management and International Ocean Governance;*
- E. *whereas ocean acidification, marine litter, overfishing, plastic pollution, invasive species, habitat degradation and climate change through rising sea temperatures and the growing frequency of marine heatwaves poses a significant threat to marine biodiversity, while illegal, unreported and unregulated (IUU) fishing, overfishing and shadow fleets threaten global and EU biodiversity and fisheries, and create unfair competition for EU fishers;*
- E a.** *whereas shadow fleets and opaque ownership structures represent a distinct and heightened threat to maritime security, public health and safety in coastal areas — including through the increased risk of oil spills, accidental discharges, hazardous-waste releases and other incidents that endanger human life, livelihoods and coastal ecosystems;*
- E b.** *whereas freedom of navigation and the ability to operate at sea are increasingly challenged worldwide, while essential maritime infrastructure faces growing risks;*
- E c.** *whereas hybrid threats, cyberattacks and recent acts of sabotage transcend borders, including damage to pipelines and underwater communication cables, GPS*

*interference in the Baltic and Black Sea, and assaults on shipping routes in the Red Sea, underscore the exposure of maritime infrastructure, sea lines of communication, and global trade to hybrid threats, cyberattacks, piracy, and rising geopolitical tensions and therefore maritime security has become a strategic priority for the European Union for its economy, connectivity and digital sovereignty;*

*E d. whereas the fifth round of negotiations for a coming global plastics treaty took place in August 2025 but without a consensus on a treaty;*

F. whereas Brexit introduced new complexities to fisheries governance in the North-East Atlantic, *negatively* affecting *structured and orderly cooperation in fisheries management and ocean governance, including* quota allocation, access to fishing grounds and trade dynamics;

*F a. whereas Regulation (EU) 2025/2077, strengthens the EU’s ability to act against non-sustainable fishing practices by third countries, by defining clear criteria for “failure to cooperate”, grounded in international law and independent scientific evidence with the aim to safeguard shared fish stocks, reinforce cooperation within RFMOs, and ensure a level playing field for EU fishers operating under high sustainability standards;*

*F b. whereas the European Ocean Pact propose six key priorities for the EU including strengthening EU ocean diplomacy, protecting and restoring ocean health, enhancing maritime security and advancing ocean research and knowledge.*

### COMP 2

#### **Strengthening ocean diplomacy**

*Covers (AMs falling if CA 2 is adopted): 58 (EPP), 59 (EPP), 60 (S&D), 61 (ECR), 62 (Renew), 63 (ESN), 64(S&D), 65 (EPP), 66 (Left), 67 (EPP), 68 (S&D), 69 (EPP), 70 (EPP), 71(Greens), 72 (EPP), 73 (S&D), 74 (ESN), 75 (PfE), 76 (Renew), 77 (ESN), 78 (ECR), 79 (EPP), 81 (S&D), 83 (EPP), 84 (S&D), 85 (EPP), 86 (PfE), 88 (Greens), 89 (Left), 90 (ESN), 91 (EPP), 92 (S&D), 93 (Renew), 95 (PfE), 96 (ESN), 97 (Renew), 98 (EPP), 99 (S&D), 100 (EPP), 101 (EPP), 102 (S&D), 103 (Left), 104 (Greens), 105 (Left), 106 (Renew), 107 (PfE), 108 (ESN), 109 (S&D), 110 (ECR), 111 (S&D), 112 (EPP), 113 (EPP), 114 (Left), 115 (EPP), 116 (S&D), 118 (S&D), 119 (EPP), 121 (Left), 122 (Greens), 123 (S&D), 125 (S&D), 126 (EPP), 130 (EPP), 131 (EPP), 132 (Greens), 133 (EPP), 134 (Renew), 135 (PfE), 137 (ESN), 138 (S&D), 141(ESN), 142 (EPP), 143 (S&D), 144 (Greens), 145 (S&D), 147 (ECR), 148 (S&D), 149 (PfE), 161 (EPP), 178 (ECR), 179 (EPP), 279 (Renew), 281 (Renew), 291 (EPP), 294 (EPP), 295 (EPP)*

**Supported by:** S&D, ECR, Renew,

1. Highlights that the EU *should continue* to lead *International* Ocean Governance *agenda as it is uniquely positioned considering* the size of its maritime area, *the geostrategic position of the outermost regions in all oceans, its historical leadership, its economic relevance and* weight, and legal and regulatory leadership; recalls that the EU has the largest exclusive economic zone in the world and is already *one of the front-runners* engaged in *sustainably managing, protecting, safeguarding and restoring* its marine *habitats and* resources for future generations;

*1 a. Stresses that the ocean is a geopolitical and economic asset central to Europe's competitiveness and cultural identity, that ocean diplomacy is part of International Ocean Governance; believes that this should not be limited only to geopolitical or security approaches, but should also take in consideration general ocean management and governance, that reflect the environmental, economic, cultural, social and territorial dimension of the sea, and its importance to fishing communities as well as coastal, island and outermost regions communities;*

2. Calls for the *mainstreaming* of ocean diplomacy into the EU's external action, such as development, common foreign and security policy to defend a rules-based maritime order *with multilateral cooperation in line with UNCLOS; notes that enhanced cooperation among Member States and European agencies, in particular EMSA, Frontex, EFCA, EEA and EUSPA;* would help *to* ensure the sustainable exploitation of marine resources, promote EU *environmental, economic and social* standards, *notably in international organisations, including the FAO, ILO and WTO,* and counter IUU fishing, *through stricter controls on unregulated fishery imports, conditions for accessing EEZs;*

*2 a. Underlines the importance of tackling* shadow fleets, piracy and *intimidation*, hostile or violent *acts originating from third countries to the prejudice of EU fishers* and EU *maritime* infrastructures, through specific measures, such as naval missions, *satellite monitoring using Copernicus and naval drones; calls for the strengthening of EU military, non-military and naval missions dedicated to monitoring and combating IUU fishing activities, controlling safety of vessels, trafficking and phantom fleets; reminds that trafficking and phantom fleets are increasing the risk of major pollution incidents and endangering coastal areas and their population, and suggests the establishment of an EU emergency and remediation facility to assist in response and recovery efforts following environmental accidents linked to these operations;*

3. Welcomes the European Ocean Pact *that has the objective to develop* an integrated strategy that unites maritime *policies and builds coherence across sectors, including ocean diplomacy, blue economy, environmental responsibility, protection, industrial maritime strategy, fisheries and aquaculture production, maritime security, trade aspects and development policy;* underlines that through a combination of naval deployments, infrastructure surveillance, insurance and market stabilisation measures, enhanced cyber defences and robust legal enforcement, the EU can maintain secure and dependable trade routes and fishing spots, thereby bolstering its credibility and leadership in the global rules-based order; *calls for a regular organisation of "Oceans Summits" at an European level, involving all relevant ministers, the European Parliament and Commission, to follow up on the implementation of the Ocean Pact and to develop a strong and dynamic international ocean governance and ocean diplomacy contributing to a broader Union*

*broader ocean agenda and to the global rules-based order;*

4. Welcomes the *new* Pact for the Mediterranean as a flagship initiative to strengthen peace, stability and prosperity in the region; *notes in particular the emphasis on promoting and improving legal frameworks relating to RFMOs and combatting IUU fishing in the Mediterranean through capacity building, monitoring, control and surveillance as well as the aim of helping to mobilise large-scale regional projects that create opportunities for people and business; underlines that the Mediterranean fishing fleet is predominantly composed of small-scale vessels, accounting for around 80% of the total EU fleet in the region, and is already facing multiple challenges also with neighbouring countries affecting the sector's attractiveness and socio-economic sustainability; recognises the importance to foster regional cooperation on maritime security, environmental protection, and sustainable blue economy development*; calls on the Commission, in close partnership with the Union for the Mediterranean and other regional bodies, to prioritise the implementation of this pact and to draw on the experience and best practices of previous such initiatives to ensure tangible benefits for coastal communities *with a particular focus on youth, women, and small businesses*, ecosystems, *food sovereignty* and economic resilience across the basin *and the connected Black Sea*;

5. Calls on the Commission to make full use of robust International Ocean Governance and Ocean Diplomacy as a strategic tool to advance common objectives and EU strategic interests through its participation in RFMOs and through its network of sustainable fisheries partnership agreements (SFPAs), with a particular focus on sustainable governance, thereby ensuring a genuine level playing field, compliance and fair competition between EU fishers and those from non-EU countries, while emphasising the necessity for the EU to maintain a fishing fleet that can take advantage of the new fishing opportunities created by the expansion of SFPAs to secure EU food sovereignty, while contributing to local economic resilience *and sustainable resource management*;

*5 a. Welcomes the announcement of a new generation of SFPAs as outlined in the European Ocean Pact aligned with the EU's regional strategies for Africa and the Indo-Pacific, and stresses the need to ensure that these agreements respect scientific advice and human rights, while further deepening cooperation with partner countries both bilaterally and strengthening common action in international fora's such as in RFMOs as well as reinforce the EU's global leadership in promoting sustainable fisheries partnerships; highlight that this new generation of SFPAs, should also be an opportunity to improve fleet sustainability, reduce pressure on stocks highly exploited, diversify origine of fishing products and reduce the dependence of the EU on third countries fishing products; calls on the Commission to adopt a globally influential communications strategy to assert its ambitions and its leadership;*

*5 b. Calls for attention to be given to "dormant agreements" so as to either activated these agreements by initiating negotiations or to terminate them, in order to enable EU operators to explore other arrangements in compliance of applicable EU rules such as direct authorisations; Highlights that the WTO Agreement on Fisheries Subsidies from 2020 explicitly excludes SFPAs from its scope;*

*5 c. Further calls on the Commission to persist in its efforts, notably through its action in RFMOs, its network of SFPAs and its Memorandum of Understanding (MoU), to bring greater transparency and accountability to all fishing nations, especially those that not uphold the same high social, safety and sustainability standards as EU fleets, ensuring*

*that they endorse standards that protect workers in line with ILO conventions, provide detailed information on their fleet activities, report their catches accurately and comply with conservation and management measures;*

*5 d. Calls on the Commission to explore ways with Mediterranean partner countries to promote and harmonise shared management of marine resources, a level playing field in terms of rules and controls, regional stability and security, to secure the long-term economic future of operators, by for example deepening cooperations in RFMOs or concluding an SFPA;*

*5 e. Stresses that SFPAs must guarantee fair and non-discriminatory treatment of EU vessels, with access fees and conditions that are proportionate, transparent, and aligned with the principle of a level playing field; underlines that all vessels operating in partner countries' EEZs should be subject to the same financial and technical requirements, for instance through mirror measures, and calls for the strengthening of the non-discrimination clause in future SFPA Protocols to prevent partner countries from granting more favourable conditions—financial or technical—to other foreign fleets; emphasizes the need for effective monitoring and enforcement of these clauses, noting the current lack of detailed information in Commission evaluations regarding their implementation and effectiveness; calls therefore on the Commission to systematically include comprehensive analysis and data on this aspect in future SFPA evaluation reports;*

*5 f. Calls, in order to improve the implementation of the IUU Regulation on the Commission and Member States to address the lack of transparency in the fishing sector of third countries which results, for example, from flags of convenience, flag hopping, complex corporate structures and a lack of public information on beneficial owners; further highlights the importance of preventing the European fleet from being replaced by less sustainable non-EU fleets;*

*5 g. Considers it important in negotiations to priorities the role of having an EU presence as well as vessels flagged in the Union and enabling them access to fishing grounds; believes that having vessels flying the flags of EU Member States is preferable for food supply, control and sustainability and contributes to the Union's strategic autonomy in food security;*

*5 h. Recognises the strategic importance of joint ventures in fishing as a useful model of cooperation between the European Union and third countries; highlights that these schemes generate economic and social value both within the EU and in third countries, while ensuring the supply of high-quality and sustainably caught marine protein to European consumers and help promote responsible fishing, fair employment and sustainable growth, contributing directly to several Sustainable Development Goals, as well as to the objectives of the EU in ocean governance;*

6. Notes with approval the joint communication from the Commission of 24 June 2022 on the EU's international ocean governance agenda and the recent adoption of the European Ocean Pact by the Commission, *which implementation shall be supported by necessary financial support such as the EUR 1 billion pledged at UNOC3 as voluntary commitments* to safeguard marine biodiversity and reinforce the development of a sustainable blue economy; welcomes the integration of the European Ocean Pact into the EU Competitiveness Compass as a strategic element for long-term EU growth, *while*

*regretting the risk of competition among maritime sectors to access the funding;*

7. Urges the EU to support **relevant** stakeholders in establishing a European maritime industrial alliance that integrates fisheries, aquaculture, shipbuilding, **shipping**, strategic investments and technology, while acknowledging the interdependence of all maritime sectors in terms of competitiveness, employment, **energy** and digital transitions and the sustainable use of marine and aquatic resources;

8. Calls for the European External Action Service to significantly increase investment in the training of European diplomats on ocean-related issues, with a particular emphasis on strengthening expertise in maritime and ocean governance within EU delegations and missions to non-EU countries, especially in coastal countries; **stresses the need to enhance understanding of EU blue economy investments, operations and challenges within their areas of competence in line also with the Global Gateway Strategy;** calls for the involvement of the European External Action Service in promoting the strategic importance of the European Ocean **Pact with support or guidance from the Commission's relevant directorates-general, such as DG MARE;**

## COMP 3

### **Fisheries and aquaculture competitiveness**

*Covers (AMs falling if CA 3 is adopted): 80 (EPP), 125 (S&D), 152 (Left), 153 (S&D), 154 (Renew), 155 (EPP), 156 (ECR), 157 (ESN), 158 (Greens), 159 (Pfe), 160 (S&D), 162 (EPP), 163 (S&D), 164(EPP), 165 (Greens), 166 (Renew), 167 (ECR), 168 (EPP), 169 (Greens), 170 (ESN), 171 (S&D), 172 (EPP), 173 (EPP), 174 (Renew), 175 (ECR), 176 (EPP), 180 (S&D), 181 (EPP), 182 (EPP), 184 (EPP), 185 (EPP), 186 (Renew), 187 (Left), 188 (EPP), 189 (ECR), 190 (EPP), 191 (S&D), 192(ESN), 193 (S&D), 194 (Greens), 195 (EPP), 196 (S&D), 197 (Greens), 198 (ESN), 199 (S&D), 200 (EPP), 201(Renew), 202 (ECR), 203 (EPP), 204 (EPP), 205 (Left), 206 (ECR), 207 (EPP), 208 (EPP), 209 (Renew), 210 (S&D), 211 (Left), 212 (ESN), 213 (EPP), 214 (Greens), 215 (EPP), 216 (S&D), 217 (EPP)*

**Supported by:** S&D, ECR, Renew, ESN

9. ***Calls on the European Commission*** as part of the ongoing CFP evaluation to present solutions to reduce administrative burdens ***and simplify administrative procedures through an omnibus proposal*** and expedite procedures for projects that enhance food security ***and sovereignty; considers that leading by example with a profitable sector with strengthen common sustainability standards in order to better lead the way for development of these standards globally;***

9 a. Highlights, ***that actions, such as*** simplified access to land and coastal areas ***developed in close*** cooperation with the European Investment Bank and ***regional and*** local authorities as essential steps for maintaining a sustainable, ***resilient*** and competitive aquaculture sector; ***underlines that within a revised Common Fisheries Policy or with a new Common Aquaculture policy, should help to enhance food security and sovereignty with stable seafood supply to EU consumers;***

9 b. ***Stresses that fisheries and aquaculture are strategic assets for food security,***

*sovereignty and coastal rural development; urges the Commission to fully integrate fisheries and aquatic food production into the EU's wider food security, nutrition, and sustainability strategies; insists that the three CFP sustainability pillars should be equally developed and non should undermine the viability of the others; calls on the EU and Member States to strengthen cooperation between fishers and other maritime stakeholders in areas such as maritime spatial planning, renewable energy deployment, seafood supply chain organisation, the circular economy, and diversification under the sustainable blue economy framework, acknowledging the broader identity and role of fishers as guardians of the marine environment and drivers of local development in coastal communities;*

10. Urges the Commission to thoroughly assess the structural and environmental factors and trends, affecting the long-term sustainability, *competitiveness, dependence* and profitability of fisheries, *aquaculture, first-sale and processing operators, especially in island and outermost regions; suggests to develop measures addressing those factors and trends with specific and immediate action that prevents the gradual disappearance of European fishing activities;*

11. *Points out the need to make the EU fishing and aquaculture sector attractive and competitive vis-a-vis global competitors; calls on the Commission to ensure that all Member States and relevant stakeholders commit to the swift implementation of the CATCH system for all fishery and aquaculture products imported into the Union, and to promote the voluntary use of the system by third countries;*

*11 a.* Calls for targeted measures to ensure generational renewal and enhance the attractiveness of fishing careers *also for women*, through *ensuring sustainable management and rebuilding of fish stocks as well as* investments in modern, safe and digitalised fishing fleets *without increasing their fishing capacities*, training programmes, *safety at sea, the development of vocational training, particularly in the maintenance of maritime drones and remotely operated robots, occupational and non-occupational disease, risk* prevention initiatives and improved working conditions;

12. *Recalls that island and outermost regions face permanent natural and geographic constraints that affect the competitiveness of their fishing fleets and island economies; calls for specific attention to investments as well as measures, funding and support for example for the decarbonisation, renewal and modernisation of fishing fleets and infrastructure improvements particularly in the outermost regions (ORs) in order to enhance attractiveness, safeguard generational renewal and the future of the fisheries sector in those regions and as a contribution to sustainable local development; asks the Commission to pay particular attention to the involvement of ORs in the Unions fisheries partnerships with third countries, especially with neighbouring countries or regions, for instance in the form of infrastructure, fleet or sectoral supports in order to avoid any situation of unfair competition between fishers in the outermost regions and fishers in neighbouring third countries whose vessels are being renewed;*

13. Calls on the Commission *and Member States* to promote consumer awareness and encourage demand for transparency and traceability, ensuring detailed information, *also digitally* on the origin, quality and sustainability of *all* seafood products; stresses the need to ensure that *EU seafood and marine products as well as those* imported into the EU, meet *similar* environmental, *social, traceability sustainable and animal welfare* standards, enforced by *effective monitoring and sanctions, in line with WTO rules and future mirror*

clauses;

14. *Calls for action in relation to decarbonisation efforts and fleet renewal and modernisation, paying specific attention to the situation and needs of the fishing fleet in the ORs and islands; points out that a recent study<sup>1</sup> by the European Parliament suggests that future support instruments for fisheries should consider less restrictive conditions for support for the first acquisition of a fishing vessel, for engine renewal or replacement and for vessel improvements requiring additional tonnage while, at the same time, applying restrictions to avoid overcapacity or overfishing at the level of individual segments or the entire national fleet; calls on the Commission, in this regard, to address this when evaluating and simplifying unnecessary regulatory barriers within the common fisheries policy and the EMFAF;*

## COMP 4

### **Environmental and scientific leadership**

*Covers (AMs falling if CA 4 is adopted): 94 (EPP), 140 (ECR), 219 (ECR), 220 (ESN), 221 (Left), 222 (Renew), 223 (EPP), 224 (EPP), 225 (Renew), 226 (Greens), 227 (S&D), 228 (EPP), 229 (Left), 231 (Renew), 232 (Greens), 233 (Left), 234 (ESN), 235 (S&D), 236 (Renew), 237 (EPP), 238 (S&D), 239 (EPP), 240 (Left), 241 (EPP), 242 (Renew), 243 (S&D), 244 (Greens), 245 (EPP), 246 (ECR), 247 (ESN), 248 (S&D), 249 (EPP), 250 (Left), 251 (S&D), 252 (S&D), 253 (Left), 254 (S&D), 256 (Left), 257 (Left), 284 (S&D), 296 (S&D)*

**Supported by:** S&D, ECR, Renew, Left

15. Welcomes the EU's leadership in international ocean governance, particularly through its role in creating the Biodiversity Beyond National Jurisdiction High Ambition Coalition of 52 countries; *welcomes the entry into force of the BBNJ under the UN Convention on the Law of the Sea to ensure the effective conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction, to ensure the effective protection and sustainable management of the high seas; calls for the new framework to operate in a coordinated and complementary manner with existing international bodies, such as RFMOs, the FAO, IMO, as well as the CFP; stresses that implementation of the Agreement and the transposing Directive should be done respecting the competences of these bodies, the EU acquis, and the competences of the Member States;*

*15 a. Welcomes the confirmation that the failure to adopt, implement or enforce fisheries management measures-whether under RFMOs or bilateral and multilateral agreements-now constitutes a failure to cooperate under EU law; in this regard, ask the Commission in cooperation with Member States to use all instruments available to bring third countries to cooperate, such as Regulation (EU) No 1026/2012 of the European Parliament and of the Council<sup>1a</sup> establishing a framework for the identification and the adoption of measures with regard to third countries which fail to cooperate and allow non-sustainable fishing of a stock of common interest for the Union;*

16. Recognises the *importance of the* precautionary principle *of an international*

---

<sup>1</sup> [https://www.europarl.europa.eu/RegData/etudes/STUD/2024/759324/IPOL\\_STU\(2024\)759324\\_EN.pdf](https://www.europarl.europa.eu/RegData/etudes/STUD/2024/759324/IPOL_STU(2024)759324_EN.pdf)

moratorium on deep-sea mining as a matter of global environmental responsibility that might *affect among others* ocean governance and fisheries; *highlights, in this regard, the importance of applying the precautionary principle to deep-seabed mining projects until their effects on marine environment and biodiversity have been sufficiently studied and researched; insists that the EU shall continue to participate actively in the global efforts on research and exploration of the deep sea, while setting the highest standards for sustainable resource management; welcomes that the Commission advocates a precautionary pause* on deep-sea mining and calls therefore for the Member States to *confirm this approach*, including through the International Seabed Authority, until comprehensive scientific research *and knowledge on its impacts is available* and demonstrate that such activities can be managed without causing biodiversity loss or ecosystem degradation;

16 a. *Calls for the support of an international moratorium on deep-sea mining and reminds the EU and Member States as members of the International Seabed Authority of their legal obligation in accordance with the UN Convention on the Law of the Sea (UNCLOS) to respond with appropriate measures to any attempts to bypass the International Seabed Authority as the competent international body for regulating deep-sea mining activities beyond national jurisdiction as might have an impact on international ocean governance;*

16 b. *Calls on the Commission and Member States to push for the international moratorium on whaling and the hunting of large cetaceans within the International Whaling Commission and international bodies is respected by all countries and regions, and that existing exceptions are not abusively used as support to commercial objectives;*

17. *Stresses that the designation of any marine protected areas (MPAs), must be preceded by full impact assessments and effective consultation of concerned stakeholders, have clear objectives and effective monitoring, control and surveillance measures, based on the best available scientific knowledge and advice; highlights the need to take into account the three pillars of sustainable development that must go hand in hand with EU strategic autonomy and the importance of fishers and coastal communities in EU cohesion;*

17 a. *Reminds the need to pay specific attention to the Arctic region in line with the 2021 Arctic Strategy and expresses its support, especially for the efforts made on the establishment of the two new MPAs in the eastern Antarctic and the Weddell Sea in the Antarctic Ocean; notes the impact assessments and the opposition to MPA proposals expressed by some parties within the Commission for the Conservation of Antarctic Marine Living Resources (CCAMLR); calls for actively advocating for these marine protected areas as part of a necessary response to the growing and potentially unsustainable ambitions of other global actors in these regions and to intensify their bilateral and multilateral efforts to secure support for the establishment of new MPAs;*

17 b. *Stresses that scientific evidence must remain the backbone of decision-making in international ocean governance, serving as a common currency in multilateral negotiations and supporting sustainable governance in fisheries and aquaculture; further emphasises the need to invest in and assist scientific bodies that provide the evidence underpinning such decisions;*

17 c. *Recalls the importance of the EU global leadership in implementing the Kunming-*

**Montreal Global Biodiversity Framework that recognises the importance of Other Effective Area-based Conservation Measures (OECMs) as a complementary approach to marine protected areas; stresses the importance of including OECMs to reach the target to protect 30% of the oceans globally by 2030, provided that they meet the criteria in the above-mentioned framework;**

18. Supports the European Ocean Pact's commitment to establishing a pan-European ocean observation initiative as a cornerstone for improving the understanding and management of marine ecosystems; **supports the creation of an European Deep Sea Observatory in the Atlantic, while promoting the creation of a global network of observatories that share data and encourage mobility among scientists;** calls for enhanced cooperation within the EU on research and innovation to strengthen marine scientific collaboration **and mobility** and reinforce EU leadership in **marine science; calls on the Union, in view of the backsliding observed in certain global partners' efforts to reduce greenhouse gas emissions, to step up its efforts in and commitment to scientific cooperation for the preservation of marine and coastal ecosystems; underlines the need to provide adequate financial support;**

18 a. **Calls on the Commission to establish, under the European Ocean Pact, a dedicated "Clean Baltic" initiative addressing the unique environmental and safety challenges of the Baltic Sea; underlines that the sea basin remains heavily affected by eutrophication, pollution and the presence of hazardous wartime remnants, including munitions, chemical agents and other contaminants on the seabed;**

## COMP 5

### Trade policy and global ocean governance

*Covers (AMs falling if CA 5 is adopted): 82 (EPP), 120 (EPP), 127 (EPP), 128 (S&D), 129 (Left), 146 (EPP), 150 (ESN), 151 (S&D), 177 (EPP), 183 (Renew), 255 (S&D), 258 (EPP), 259 (S&D), 260 (ESN), 261 (EPP), 262 (Renew), 263 (Greens), 264 (ECR), 265 (EPP), 266 (EPP), 267 (P/E), 268 (EPP), 269 (ECR), 270 (Renew), 271 (EPP), 272 (Left), 273 (S&D), 274 (P/E), 275 (EPP), 276 (Renew), 277 (ECR), 278 (Greens), 280 (S&D), 282 (Renew), 283 (Left), 285 (ECR), 286 (S&D), 287 (Renew), 288 (Greens), 289 (EPP), 290 (EPP), 292 (ECR), 293 (S&D), 297 (EPP), 298 (EPP), 299 (EPP)*

**Supported by: S&D, ECR, Renew, Greens, Left, ESN**

19. Stresses the EU's responsibility to maintain leadership in international forums by driving multilateralism, engaging with **all relevant partners in fisheries' sustainability and ocean governance such as the United States and China and in setting global standards for marine sustainability and fair competition; further highlights the important role of the Advisory Councils, such as LDAC, giving advice to the European Commission for policy formulation and implementation; points out the importance of their advice being duly taken into account in decision-making;**

19 a. **Welcomes the entry into force of the World Trade Organization's Agreement on Fisheries Subsidies; underlines that this agreement is a milestone towards eliminating harmful fisheries subsidies that contribute to overfishing and overcapacity, thereby**

*fostering level playing field and sustainable management of marine resources worldwide; encourages the Commission to build on this success through ocean diplomacy, by engaging proactively with third countries, in particular with major fishing nations, to promote the ratification and effective implementation of this agreement, as well as ongoing negotiations on agreements on the next step, and to advance global commitments for sustainable, transparent and equitable fisheries management;*

*19 b. Stresses that well managed RFMOs, catering for effective multilateral negotiations resulting in strong common rules and good compliance of said rules, are central to achieving competitiveness in fisheries and aquaculture, thereby highlighting the importance of investments in the capacity of these RFMOs), as well as cooperation with UN agencies and strengthening the EU's diplomacy in these fora; stresses that the role of their compliance body remains underutilised by the Union and calls therefore on the Commission to raise and address cases of non-compliance by third countries in the relevant compliance committee of RFMOs;*

*19 c. Calls on the Commission and the Member States to strengthen customs checks with enhanced powers, making full use of a new EU Customs Agency to protect fishers from drug and migrants traffickers and other illicit activities that threaten fishers' safety and regional stability; reminds that ensuring the traceability of seafood products, effective compliance with sustainability standards, and reciprocity with fishery and aquaculture products from third countries protect fishers from illegal activities and maintain consumer confidence; emphasises that criminal networks using the fisheries sector on their operations, undermine sustainable ocean governance, distort local economies and endanger livelihoods in coastal regions; stresses that effectively tackling organised crime in fisheries will contribute to a safer and more resilient ocean economy;*

20. Welcomes the long-term arrangements between the EU and the United Kingdom, granting full reciprocal access to fishing waters until 30 June 2038; asks the Commission to *exercise vigilance in monitoring the actions that are taken by the UK in order to safeguard the interests of the Union, its operators and citizens as well as* remain firm against any unilateral decisions that would de facto reduce EU fishers' access to UK waters, *such as those related to the implementation or planned designation of marine protected areas and the sandeel fishing ban, and to use TCA mechanisms to remedy any resulting loss of fishing rights; calls on the Commission to ensure long-term and stable EU–UK fisheries arrangements also beyond 2038;*

21. Calls on the EU to intensify its engagement with Norway through the high-level roundtable on fisheries and oceans dialogue to resolve outstanding issues *such as the cod debt owed by Norway to the EU from 2021* and ensure a fair and level playing field between EU and Norwegian fishers; *calls on the Commission to make every effort to reach a comprehensive agreement on shared stocks with coastal states in order to prevent overfishing of those stocks and to guarantee European fishers fair and sustainable fishing opportunities; calls on the Commission to make use of all the options offered by Regulation 1026/2012 with regard to countries that allow unsustainable fishing, including the use of sanctions;*

*21 a. Stresses that the European Union should use its market power as a strategic tool to defend its interests and promote sustainability; underlines that access to the EU market must be conditional on compliance with Union standards, ensuring that seafood imported into the Union does not originate from illegal or unsustainable sources, nor from*

*activities linked to human rights abuses;*

*21 b. Highlights the longstanding relationship with Greenland on fisheries related matters and points out the importance of deepening the relationship for EU fishers as well as for joint actions to ensure sustainable management of fish stocks in the North Atlantic;*

*22. Calls on the Commission to ensure proper and full implementation of EU rules related to addressing third countries allowing for non-sustainable fishing as well as provide greater legal clarity on non-sustainable fishing practices and trigger EU enforcement measures under EU-law, including trade restrictions such as import bans, in order to strengthen the EU's ability to address unsustainable practices particularly those affecting small-pelagic stocks such as mackerel and ensuring consistency between trade policy and ocean diplomacy objectives; stresses that many of these practices are already well-identified yet insufficiently addressed by current enforcement measures;*

*22 a. Urges the Commission to strengthen monitoring, control and enforcement mechanisms concerning Russian fishing activities and seafood trade flows, including transshipments and re-exports through third countries; calls for further restrictions on imports of fisheries products from Russia; calls for the introduction of strict traceability requirements and coordinated inspections and to prevent the entry of fish caught or processed by Russian operators into the EU market;*

*22 b. Stresses the importance of ensuring consistency between the standards imposed on European producers and those applied to imported products, particularly in the context of current or future trade agreements between the European Union and its trade partners, for example by introducing mirror measures; calls furthermore on the Commission to continue assessing the relevance of those autonomous tariff quotas in view of their impact on the European fishing industry and to adapt them where necessary; Reiterates its call for canned fish and seafood to be treated as 'sensitive products' in trade negotiations; calls on the European authorities to exercise caution and step up controls to ensure that any exports benefiting from autonomous tariff quotas are not a product of IUU fishing;*

*22 c. Calls on the Commission to ensure that the CFP objectives are fully integrated into the EU position in all international fora, such as the Convention on Biological Diversity (CBD) or Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), where marine biological resources, including fisheries resources, are discussed;*

## **COMP 6**

### **Budgetary and institutional measures**

*Covers (AMs falling if CA 6 is adopted): 87 (S&D), 117 (Greens), 136 (S&D), 139 (EPP), 218 (EPP), 300 (S&D), 301 (EPP), 302 (EPP), 303 (EPP), 304 (Left), 305 (Greens), 306 (ESN), 307 (Renew), 308 (S&D), 309 (EPP), 310 (Greens), 311 (S&D), 312 (S&D), 313 (Left), 314 (S&D), 315 (Renew), 316 (EPP), 317 (ESN), 318 (EPP), 319 (EPP), 320 (ECR)*

**Supported by:** S&D, ECR, Renew, Greens, Left, ESN

23. Strongly insists on the need for significant funding for ocean governance and diplomacy, especially in order to maintain a strategic fishing sector, ***to ensure that the EU can deliver on its global commitments, strengthen its strategic role, and support the future resilience of coastal communities***; notes with concern that the proposals for the next multiannual financial framework indicate a ***ringfencing*** of only EUR 2 billion to fisheries and aquaculture for the 2028-2034 period, representing barely one third of its previous ***guaranteed*** funding level;

***23 a. Calls on the Commission to guarantee an adequate level of funding for the post-2028 multiannual financial framework, for fisheries related expenditure, such as objectives currently covered in the European Maritime, Fisheries and Aquaculture Fund (EMFAF); points out the importance of EU funds remaining a strong tool to support generational renewal, gender equality, food security, fleet modernisation and socio-economic sustainability;***

***23 b. Highlights the crucial role of small-scale fisheries in sustaining local economies and communities across the world; stresses that for the EU to improve its strategic and food autonomy rebuilding EU stocks is crucial and to create the conditions for long-term resilience and competitiveness of the EU it is essential that the European small scale fishing sector is adequately supported both from EU and national level;***

***23 c. Notes that all diplomacy implies a costly projection capacity, and it would therefore be appropriate to establish a specific financial instrument for fisheries in island and outermost regions, for instance by re-establishing the Programme of Options Specifically Relating to Remoteness and Insularity (POSEI-Fisheries), which has been integrated into the EMFAF, in order to support the sector in overcoming geographic and structural constraints and ensuring the long-term viability of local fishing communities; highlights the importance to ensure the use of current tools, like Copernicus Marine Service and new capabilities or technologies, such as drones;***

24. Calls on the Commission and Member States to ensure that fishers and stakeholders in the blue economy have effective and simpler access to financing instruments, ***with allocation of minimum dedicated funds***, such as the European Competitiveness Fund, which supports investment in a sustainable blue economy, and Global Europe – the EU Neighbourhood, Development and International Cooperation Instrument, which underpins ocean ***governance and*** diplomacy and efforts to combat IUU fishing, ***as well as funding for SFPAs*** and complementary funding sources such as the Just Transition Fund, REPowerEU, Horizon Europe and the European Investment Bank; ***Urges the European Commission to guarantee sufficient administrative and legal stability for private investments to foster the development of maritime sectors.***
